

People's Republic of China: Energy Development Eleventh Five-Year Plan

ABSTRACT

The Plan depicts the 11th Five-Year development blueprint for the energy sector through 6 sections:

- (i) energy situation,
- (ii) guiding principles and goals,
- (iii) construction priorities,
- (iv) energy saving and environment protection,
- (v) science and technology improvement, and
- (vi) protection and prevention measures.

Among other things, the construction priorities involve energy bases, energy reserve and transport, petroleum substitution, industrialization of renewable energy, and new countryside energy projects.
