

People's Republic of China: Railway Eleventh Five-Year Plan

ABSTRACT

The Plan reviews the achievements made during the 10th Five-Year period and analyzes the situations confront the 11th Five-Year period. After clarifying the guiding principles and main goals, the Plan introduces priority tasks of the railway development for 2006–2010, namely, accelerating the construction of advanced railway network, vigorously promoting the modernization of techniques and facilities, ensuring railway transport safety, enhancing railway service quality, actively and stably pushing forward railway reform, and strengthening capacity building.
