

# People's Republic of China: Road and Water Transport Eleventh Five-Year Development Plan

## ABSTRACT

The Plan describes its background, including the great achievements in road and water transport development during the 10th Five-Year period, and analyzes the situation and needs for the 11th Five-Year period.

Based on clear guiding principles and development goals, the Plan introduces the 8 aspects of development focus, which deals with

- (i) accelerating transport infrastructure construction,
- (ii) vigorously promoting the coordinated transport development,
- (iii) enhancing transport efficiency and service quality,
- (iv) striving to promote the transport equipment modernization,
- (v) strengthening the water safety and rescue system,
- (vi) accelerating traffic informatization,
- (vii) implementing traffic science and technology innovation and talent strategy, and
- (viii) building an economic transportation.

Meanwhile, the Plan also gives 6 major policies measures, including financing, deepening the reform, strengthening legal system, standardizing transport market, enhancing planning guidance, and promoting transport sustainable development.
