- phyto-sanitary;
- veterinary;
- radiation;
- transport;
- customs.

Point of customs clearance (CBX):

- Controlling bodies

Database of "Uniform interagency document"

Release

Goods delivery control system:

- Safe package;
- GPS-escort;
- Locking and sealing devices.

**Data transfer to:** 

- Ministry of Agriculture;
- Ministry of Health;
- Ministry of

**Transportation**;

- State Enterprise "Single Window Center"

Radiation portal-frame monitors, set up at state border checkpoints of Kyrgyz Republic

Checkpoint "Ak Jol"

Checkpoint "Chon Kapka"

Checkpoint "Ak-Tilek"

#### **Radiation control in Kyrgyz Republic**

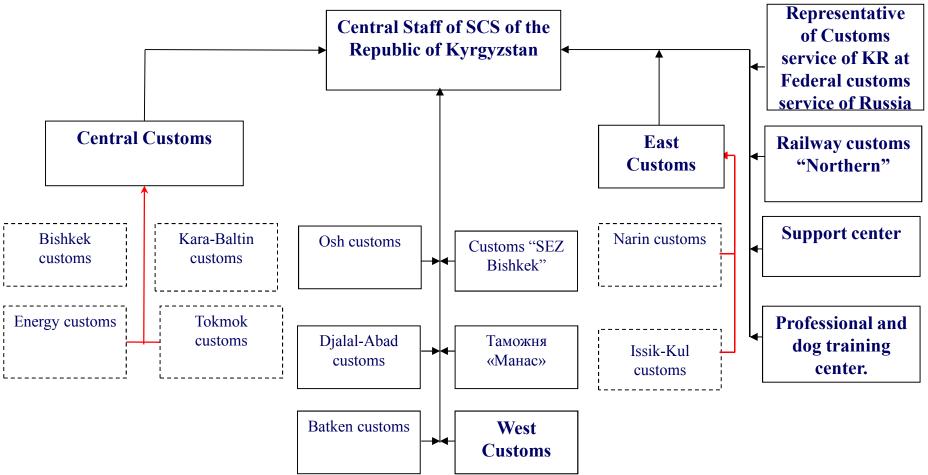

#### Control Chart of State Customs Service (SCS)

# Priority activity under the Strategy

- Developed and approved technical assignments on components of Unified Automated Information System (UAIS)
- Software testing is underway
- August-December of 2012 —training conducted for users of software product on the basis of "Manas" customs and pilot-industrial implementation of software is initiated

## Modernization and reformation of customs service of Kyrgyz Republic

- Regional Project of Asian Development Bank on modernization of customs service and infrastructure development
- Project consists of 2 components:
  - development of Unified Automated Information System (UAIS)
  - development of infrastructure of external checkpoints

#### **Development of UAIS**

This component includes three interdependent subcomponents:

- development of main systems of program applications of UAIS and related systems on operations support
- development of communication infrastructure to support UAIS operations, provision of communication linkages between central staff of customs service, regional customs offices and external checkpoints
- training and public awareness to enable customs service modernization process

#### Implementation of UAIS

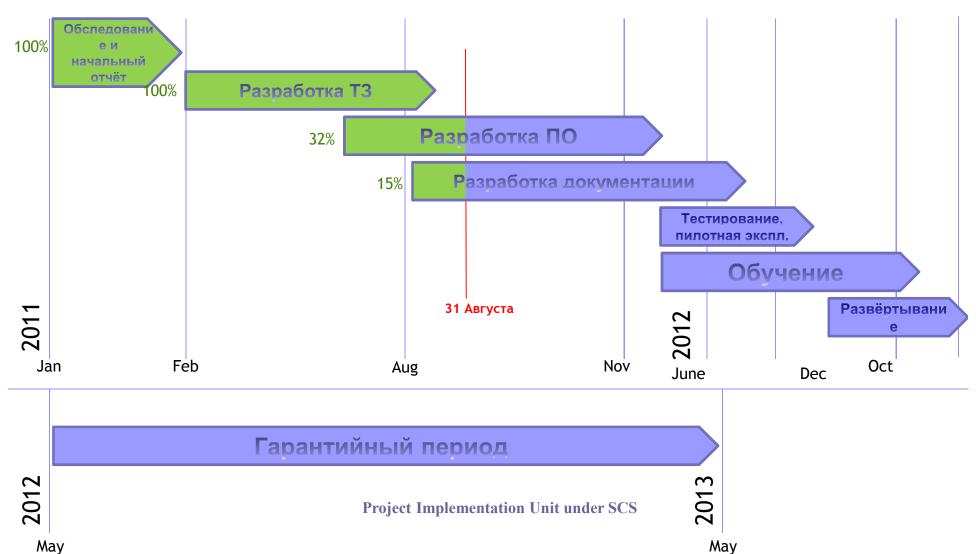

■ UAIS pilot testing started on February 1, 2012.

- System tested on the basis of live data. UAIS training of end users conducted before December 31, 2012
- As of January 1, 2013 UAIS commissioned for industrial use, currently it is implemented in northern region of the Republic.
   Full automation of processes is expected by the end of this year throughout the Republic

#### **UAIS** implementation phases

#### □ UAIS general structure:

- Classifiers and directories
- Delivery block (Delivery Control Documents)
- Automated workstation of broker
- Automated workstation of customs clearance
- Smuggles goods and customs law infringements
- Risks management system
- External interfaces (National Bank, Treasury, other)

Automated goods delivery control systems are installed at checkpoints.

### Document-arrival of cargo

## Closing date and delivery status

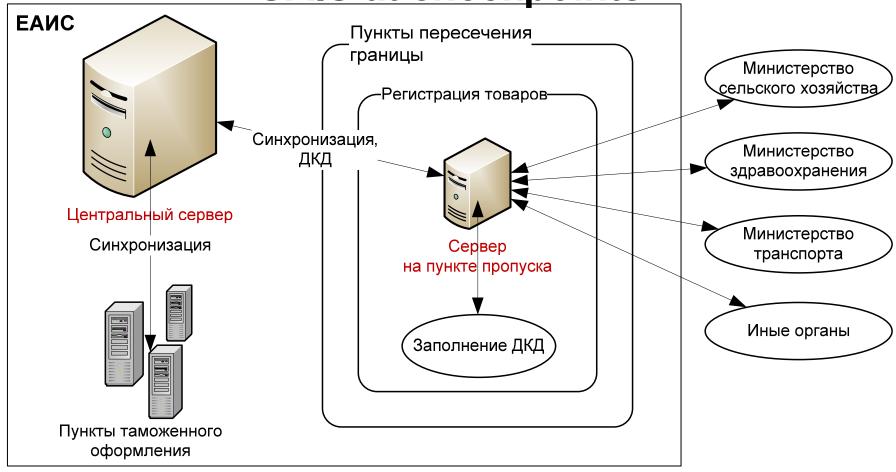

#### Bill for escort and date

**UAIS** at checkpoints

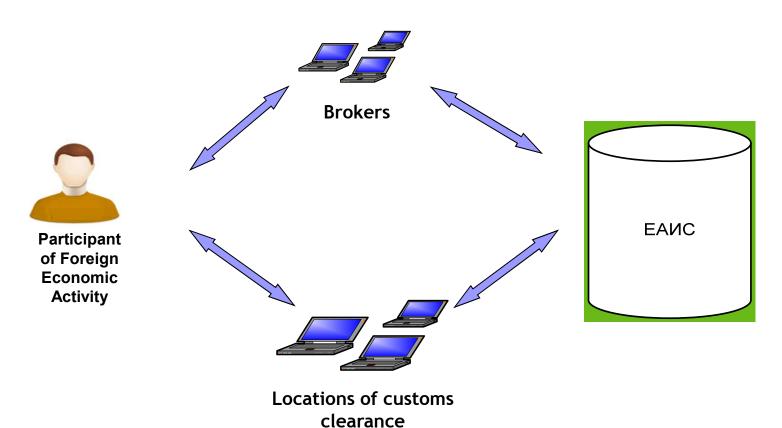

**Project Implementation Unit under SCS** 

#### **UAIS** in customs clearance

**Project Implementation Unit under SCS** 

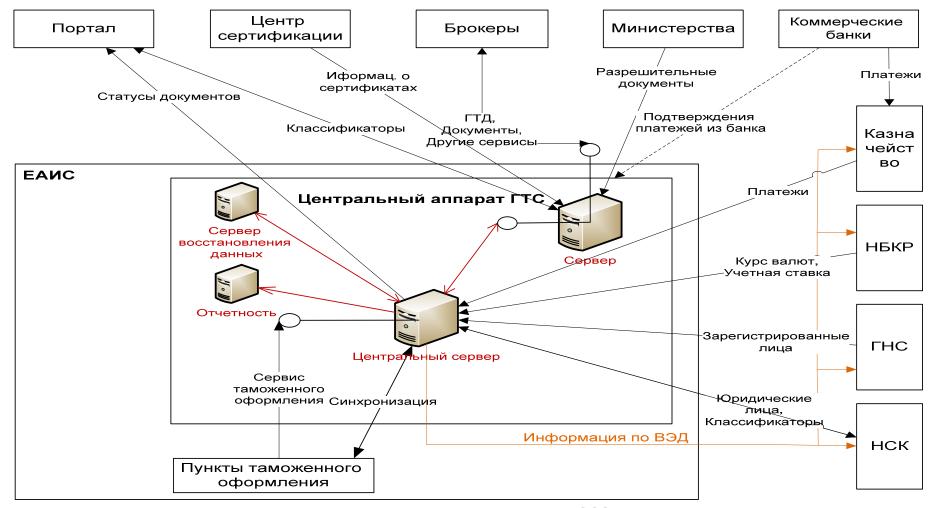

#### **Customs Clearance**

- Delivery control
- Declaration
- Placement under customs regime (relevant procedures: payment of duties, control by other agencies)
- Risks
- Release of goods

## **UAIS** communication architecture with external information systems

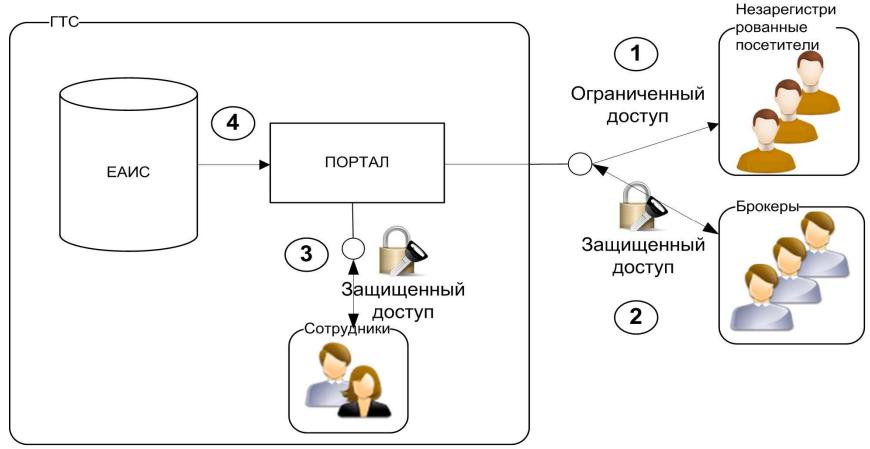

**Project Implementation Unit under SCS** 

#### **UAIS** external portal

- All users will have access to general sections of portal.
   (portal is used as source of reference information)
- For the user "Broker" the functional is set aside, related directly to activity area of brokers. All information is strictly confidential and access is secured by portal access control system.
- For SCC officers the functional is set aside on filling the sections of the portal, settings and configurations. ГТС предусмотрен функционал по наполнению информацией разделов портала, настройка и конфигурация портала. Designated number of specialists have access to the portal.
- To ensure information actuality at the portal, synchronization of limited data volume is provided, required for valid activity of the broker and some functions of the portal.

#### **Conclusion**

As a result of implementation of strategic plan there will be established the customs service, that will facilitate economic activity of entities of foreign economic activity and it will be based on latest customs technologies and qualitatively performing the state functions.

## Thank you for your attention !!!
