Self Checking Mechanisms

How to Check

- Please double check the data entries before submission.
- You can use the Dashboard and ‘Summary’ worksheet to verify the correct entries (E.G. IF AVG SPEED IS EXCESSIVELY LOW OR HIGH, IT MAY INDICATE DATA ENTRY ERROR)
- If any charts or cells show “#N/A” or error message, this may mean your entries are incorrect. (example, a cost should be entered but a word is entered instead).

Data Accuracy

- Check the accuracy of the values.
- For example, an extra ‘0’ or missing ‘0’ can result in a wrong time and cost data.

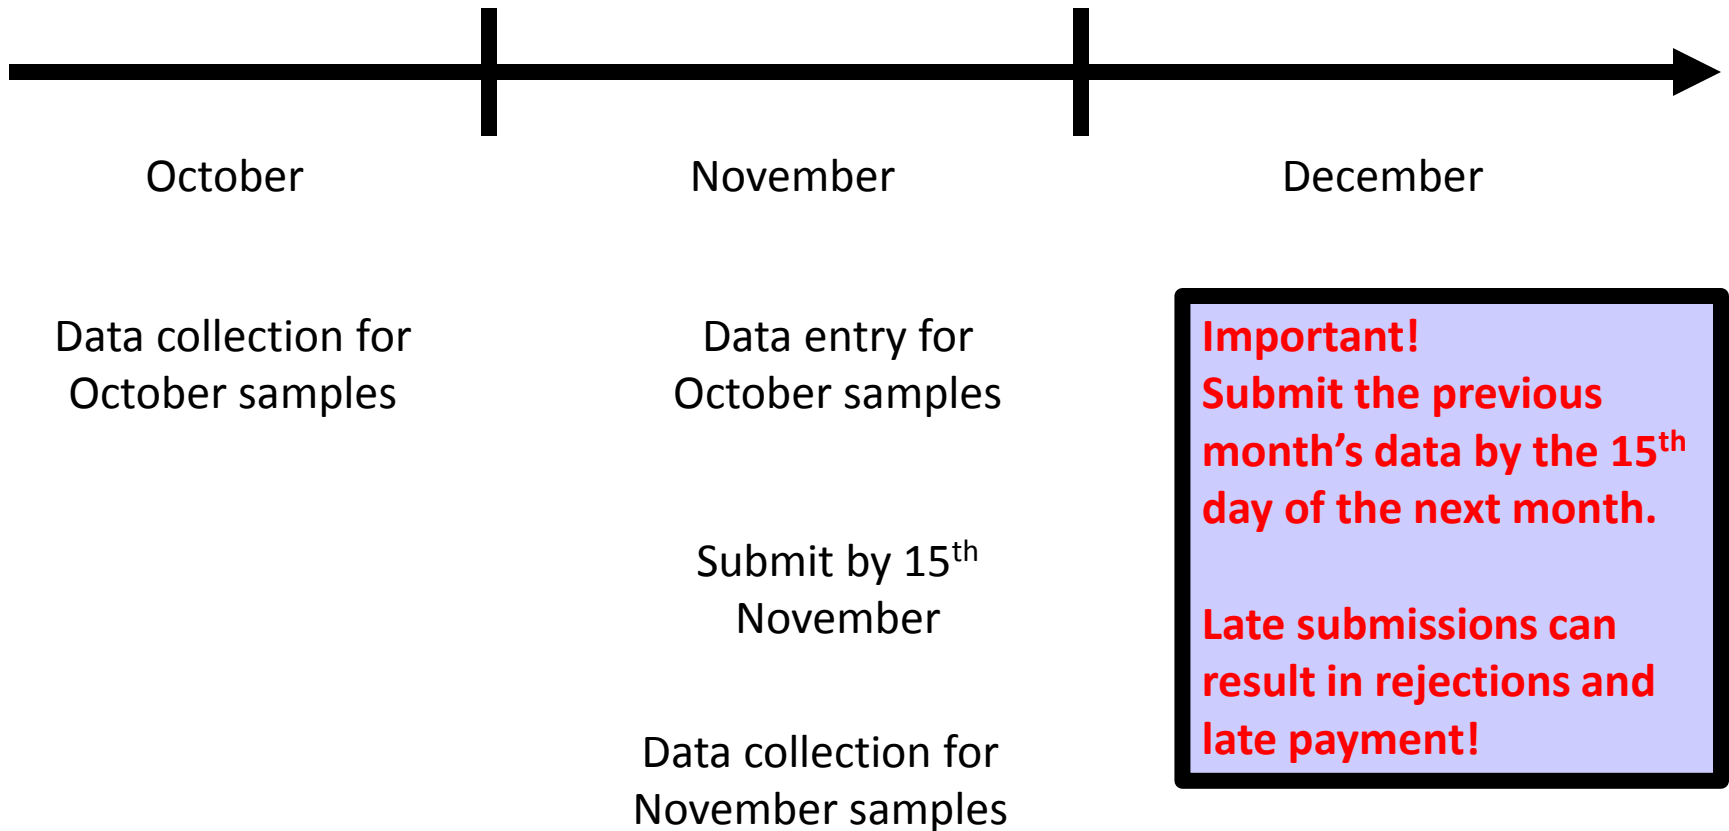

Data Entry

- Collect bona fide commercial shipment data preferably on a round trip basis (e.g. tashkent-moscow, moscow-tashkent) for better insights
- Enter actual time and cost as reported by transport operators
- work with a stable group of trained, motivated drivers & partners
- Conduct periodic training for drivers and partners as needed
- Update the real time and costs and not assume the data is the same every month
- Report to field consultants on why the data may experience a sudden or significant difference (e.g. accidents, road closure, government actions, seasonal change, market shifts).
- Submit monthly and not at the end of quarter.

Submission Dates

Important!
Submit the previous month's data by the 15th day of the next month.

Late submissions can result in rejections and late payment!

CFCFA Website

The screenshot displays the CAREC Federation website interface. At the top, there is a navigation bar with the text "Forum for CFCFA members" and "Advertisement on site". The main header features the slogan "Together we will reduce the time and distance!" and the organization's name "CAREC Federation of Carrier and Forwarder Associations". A navigation menu includes "HOME", "ABOUT CFCFA", "ABOUT CAREC", "CPMM", "ASSOCIATIONS", "NEWS", "EVENTS", "USEFUL INFORMATION", and "CONTACTS". The "CPMM" menu is expanded, showing options for "Information", "CAREC Transport Corridors", "Indicators", and "CPMM Annual and Quarterly Reports". On the left, there are directories for transport and forwarding companies, insurance companies, customs brokers, and logistics centers and warehouses, along with a "Register the company" button. The main content area shows a meeting of people at a table with microphones. On the right, there is an advertisement for "Logistika.uz" with the text "Transport & Logistics Information Portal" and "Logistics is the world of your new".
