Part I

Top-level design for "Single Window"

Goals

Declarations can be done through a single point of access and one-time submission of standard documentations and electronic information as required by port authorities and relevant international trade administrations. Relevant authorities can share information and conduct controls through e-port platform, and provide feed back to the declarants.

Standards

The collage consists of five panels:

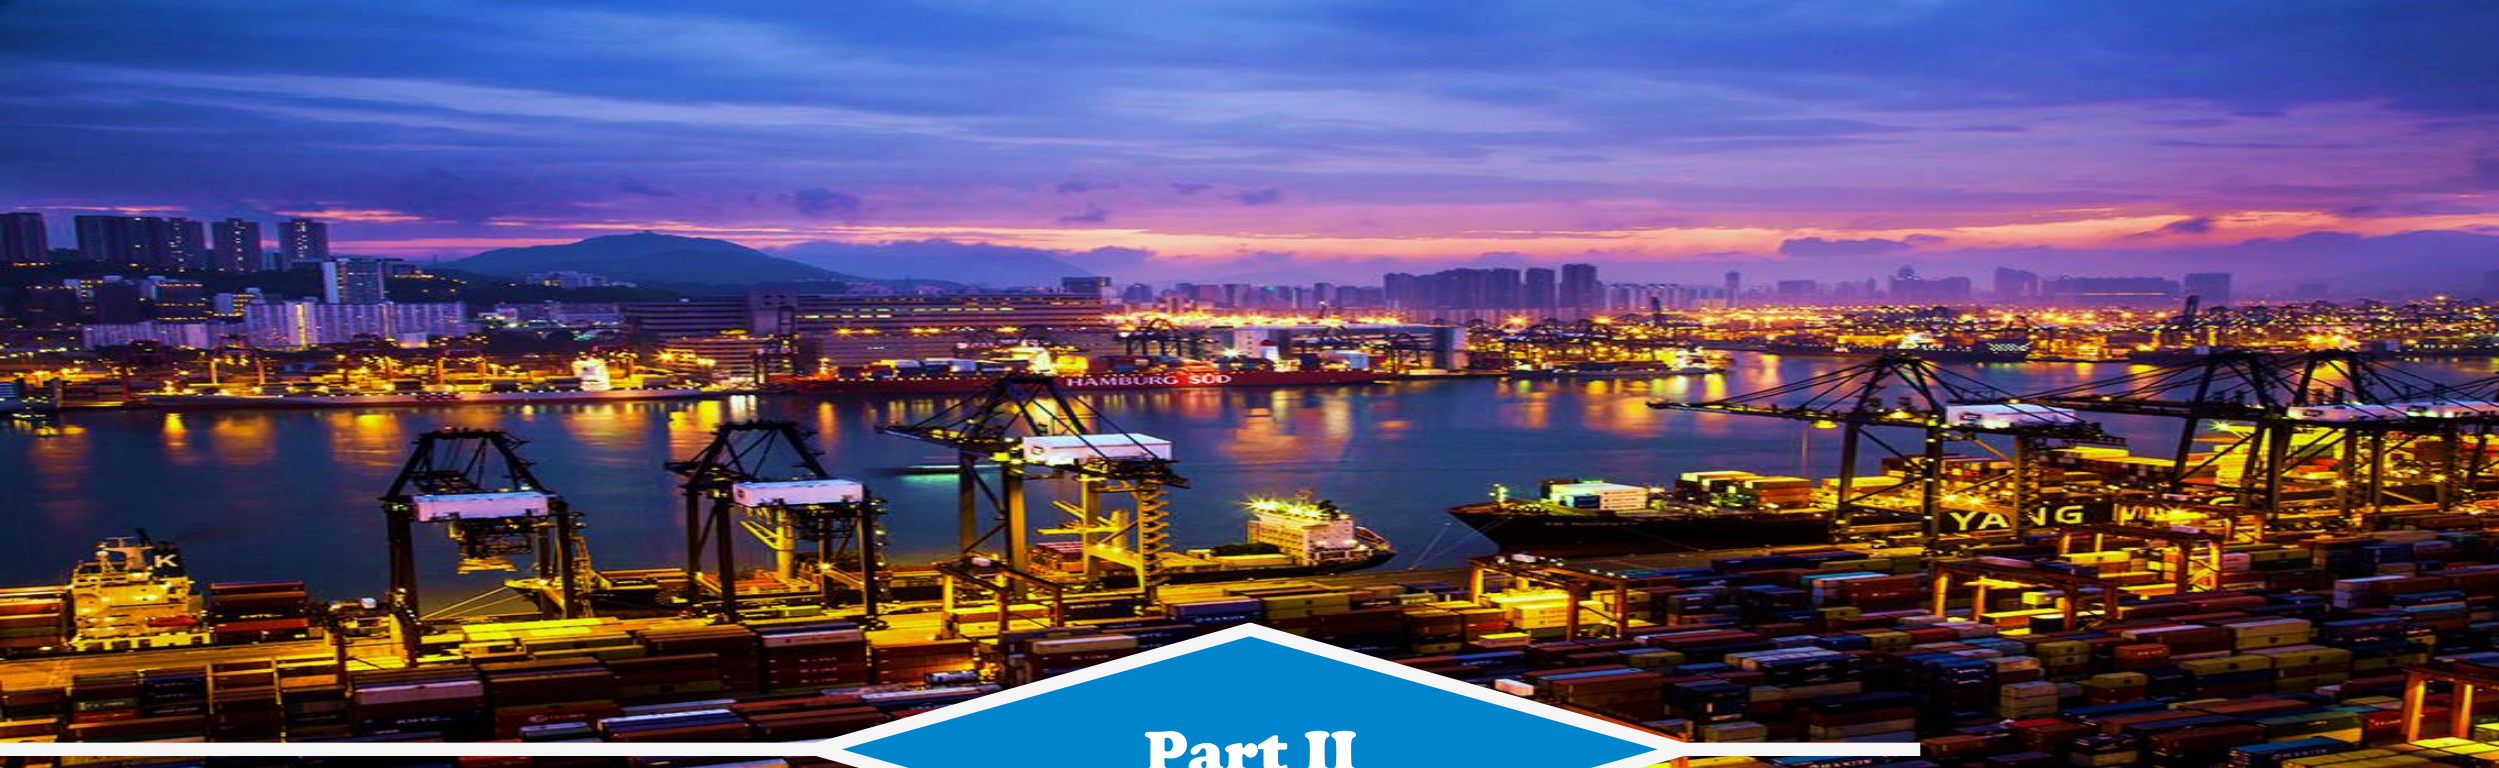

- Unified Portal:** A screenshot of the China International Trade Single Window website, showing a news section with dates from 2017-03 to 2017-05, a policy section, and a sidebar with navigation icons.
- Uniform standards:** A document cover for the national standard GB/T 15191-2010, titled "Trade data interchange—Trade data elements directory—Data elements" (贸易数据交换 贸易数据元目录 数据元). It references ISO 7372:2005 and is Volume 1 of the Data Elements MOD.
- Unified Certification:** A screenshot of the login interface for the Single Window, featuring a blue background, the logo, and fields for username and password, with a "登录" (Login) button.
- Unified operation and Maintenance:** A photograph of a call center operator wearing a headset, with the text "95198 单一窗口全国统一热线服务" and "7x24小时为您服务!".
- Unified Portal (bottom):** A partial view of the website's main content area, showing a table of information.
