

State Customs Service of Turkmenistan

Customs Administration Improvements in Turkmenistan

Customs Modernization

- ***adopting the Development Concept for 2017-2021***

Upgrading Customs Legislation

- **Customs legislation is fully based on adopted international standards**
- **The Customs Code of Turkmenistan is aligned with the requirements of the Kyoto Convention on Harmonization and Unification of Customs Procedures**

Information Technology Improvements

- **cooperation with United Nations Conference on Trade and Development c for introduction of the Integrated Customs Information System in the customs service of Turkmenistan (ASICUDA). The project is expected to be completed in 2019.**
- **launching the system to identify vehicles' geolocation using GPS (Global Positioning System).**

Structural Reforms

- **establishing a new Analytical Division in the Head Office of the State Customs Service**
- **establishing the Economic Directorate to provide processing and storage services for shipments involved in international transport operations**
- **opening Turkmenbashi international port**

Transport Infrastructure Development

- **bridge crossings across the Amu-Darya along Turkmenabad – Farap section**
- **a trunk railway linking Turkmenistan, Afghanistan and Tajikistan**
- **revival of the Great Silk Route in the new capacity in the territory of Turkmenistan**

International Cooperation

- **interaction with the International Customs Organization, various UN structures, such as the UN Office on Drugs and Crime (UNODC), the UN Development Program (UNDP), as well as BOMCA and CAREC**

- **concluding international agreements**
