

Analysis of CAREC's role on China's Economic Growth and Potential Development

Chinese Academy of Social Sciences

Xu Hongfeng

October 21-24, 2009

The role that CAREC plays in promoting member country's economic growth depends on such factors:

- politics
- economy
- military
- culture
- geography ←our focus
- others : history, religion

Basic research framework:

- **Part One: Analysis on geographical factors of China's economic growth under the framework of CAREC**
- **Part Two: Analysis on CAREC's developmental potentials in China**

Part One: Analysis on geographical factors of China's economic growth under the framework of CAREC

- related theories
- contributions of geographic factors to CAREC member countries' economic growth
- contributions of geographic factors to China's economic growth

Related theories

- comparative advantage theory
- economic growth theory
- new economic geography theory
- geography and economic growth model
- others

Contributions of Geographic factors to CAREC member countries' economic growth

- geographical situation
- economic growth speed
- economic growth size
- economic structure
- economic efficiency

Contributions of geographic factors to China's economic growth

- China's economic growth speed
- China's economic growth size
- China's economic structure
- China's economic efficiency

Part Two: CAREC's developmental potentials in China

- **development premise: mutual promotion**
- **development foundation: implement smoothly**
- **development opportunity: global financial crisis**

development premise: mutual promotion

- “demonstration effect” of China’s fast economic growth
- China provide CARED with broad market
- CARED provides China with production factors and regional market
- CARED promotes China’s opening up

development foundation:

- Energy and natural resources
- Transportation and telecommunications
- Agriculture
- Tourism
- Environmental protection
- Human resources

Development opportunity: regional financial cooperation

- Analysis of importance and feasibility
- Cooperation mechanism building
- outlook

research methods:

- theoretical foundation
- investigate in Xinjiang, Inner Mongolia etc.
- forums and workshops
- collectively compose report

Theories and Models :

- comparative advantage theory and regional division of labor and cooperation theory
- regional integration theory
- new institutional economics
- public selection theory
- international relations theory
- OCA theory
- spatial econometric theory and endogenous growth theory and model

Research Schedule:

- June 1 to August 31, 2008
- September 15 to 30, 2009
- November 30 2009
- December 10 to 11, 2009
- January 31, 2010
- February 28 2010

Thank you
