Summary

The Central Asia Regional Economic Cooperation (CAREC) Program's goal is to accelerate economic growth and reduce poverty. To support the Program, the CAREC Transport and Trade Facilitation Strategy aims to promote efficient movement of goods and people across the region by upgrading six key corridors and simplifying cross-border procedures. Private sector involvement is crucial to fulfilling the mission.

The Transport Session aims to (i) showcase regional efforts and opportunities for private sector participation in transport projects, (ii) canvass how to collaborate between private and public sectors, and (iii) examine ways to remove constraints to private sector involvement.
