

*Presentation:
Investments and Business
Development Prospects in the Republic
of Tajikistan*

Geographic Location

Republic of Tajikistan is located in the South-East of Central Asia. Its territory from West to East is 700km, and 350 km from North to South. In the West and North it borders Uzbekistan (910km) and Kyrgyzstan (630km), Afghanistan on the South (1030km) and China on the East (450km). In South-East the Afghan territory with the width form 15 to 65 km separates Tajikistan from India and Pakistan. Tajikistan territory's area is 143,100 sq. km., and only 7% are flat lands, that is why road transport is the most important and priority mode of transport. Tajikistan's population accounts for more than 7.5 million people.

Ways to implement business opportunities in the Republic of Tajikistan;

In recent years the Government of the Republic of Tajikistan implemented broad economic reforms to improve the business environment;

The factor of macroeconomic stabilization and accomplishment of high development rates for small and medium entrepreneurship;

Investments are the most important component in our economy's development;

Free economic zones as the mechanism to strengthen country's economy.

Free economic zones are created in Tajikistan in order to:

- More efficiently involve the economy of the country and its certain regions into the world economic community
- Ensure favorable conditions to attract foreign investments, technologies and managerial experience;
- Develop country's economic potential on the basis of integrating foreign investments and funds of local enterprises of multiple ownership types;
- Create modern manufacturing and social infrastructure;
- Fill the local market with consumer and manufacturing goods;
- Increase employment and living standards.

*Transport of the Republic of Tajikistan
is the integral part of its economy
and plays extremely important role.*

Since 93% of Tajikistan territory is mountainous area and only 7% are flat lands, the main mode of transport inside and to access other countries is the road transport.

Road Reconstruction in the Republic of Tajikistan

Total length of general use roads is 30,563 km, out of which 13,747 km is under the Ministry of Transport and Communications. Republican roads length is 4,782 km, and local roads account for 8,965 km. 3,903 km of roads have concrete pavement, or 28%, 6,213 km have asphalt pavement – 45%, 2,621 km are gravel roads – 19%, without pavement – 8%.

International Road Terminals on the Border

Border International Road Terminals are special facilities to regulate and service international road transport vehicles.
