# INTRODUCTION

-  Introduction
-  Methodology
-  Results
-  Recommendations
-  Appendix

October 2013

Refined TTFS 2020 and Implementation Action Plan was approved by 12<sup>th</sup> CAREC Ministerial Conference

 Introduction Methodology Results Recommendations Appendix

- Accession to the Revised Kyoto Convention (RKC) by five countries;
- Automation of customs functions with the aid of Information and Communications Technology (ICT), simplification and harmonization of customs procedures; and application of risk management procedures;
- Pilot-testing of Joint Customs Control (JCC) through adoption of a unified cargo manifest and the gradual move toward mutual recognition of inspection results;
- Accession to the Convention on International Transport of Goods Under Cover of TIR Carnets (or TIR Convention) in eight countries for regional transit; and
- Capacity building programs for customs officials and training of trainers for customs training institutes in the region.

**NEXT  
STEPS**

Take it to the Next Level by integrating trade facilitation through automated Information Exchange amongst CAREC members

 Introduction Methodology Results Recommendations Appendix

- **Context:**

- The Technical Assistance will promote a concerted approach to customs reforms in CAREC countries by applying international best practices.

- **Expected Outcome:**

- The project will simplify and harmonize clearance procedures at border crossing points in CAREC countries based on best practices.

- **Expected Outputs:**

1. Action plans to align customs regulations with the Revised Kyoto Convention developed
2. Proposals for the modernization of risk management systems developed
- 3. Framework for a CAREC customs information exchange mechanisms developed**

- Deliverables of Component 3 of TA 8585:

**3a. Development of Assessment Framework**

**3b. Conducting the Assessment Framework**

3c. Proposal of two pilot projects <sup>A</sup>

*[Green Text]: Major focus of this mid-project review*

*A – Designing the two pilot projects is not in the scope of the TA*

# METHODOLOGY

 Introduction Methodology Results Recommendations Appendix

- Why does this occur? Answer: Many countries fail to:
  - Accurately identify gaps that need to strengthen;
  - Strategically address gaps through a series of recommendations and actions based key areas;
  - Identify, resolve and share the risks of implementing a regional IE platform between customs authorities; and above all
  - Determine the type and sophistication of IE applications that can be introduced as a pilot then scaled further at a later stage.

Developing an **IE Assessment Framework** that is pragmatic and prescriptive will help CAREC members address the above issues and increase innovation in regional cooperation

# What is an IE Assessment Framework?

The IE Assessment Framework is defined by the **capabilities** of the customs agencies and the **mechanisms** (i.e. type and complexity of information exchanged).

Introduction

Methodology

Results

Recommendations

Appendix

IE Capabilities	<b>Stream 1: IE Readiness</b> The degree to which Customs is able and willing to participate in information exchange
	<b>Stream 2: IE Maturity</b> The degree to which Customs can respond (and is positioned to react) appropriately during information exchange.
IE Mechanisms	<b>Pillar 1: Harmonization &amp; Standardization</b> The ability for trade data to be processed, transmitted and re-processed without difficulty between various trading partners <sup>1</sup> and their different technologies
	<b>Pillar 2: Computerization and Efficiency</b> The degree of automation, integration and process effectiveness

## IE ASSESSMENT FRAMEWORK

Rather than thinking of Streams and Pillars as separate components, visualize a continuous intertwining of Streams and Pillars to develop a single strand of IE 'DNA'.

👍 IE Capabilities and IE Mechanisms are 'two sides of the same coin'.

<sup>1</sup> - Trading partners include relevant stakeholders such as the custom agencies, appropriate inter-government agencies, Authorized Economic Operators (AEO), etc.

For countries interested in carrying out IE initiatives, currently there are no practical tools to assess **IE capabilities** until now ...

- IE Capabilities include the **Readiness** and **Maturity** of countries to adopt, implement, and maintain IE operations (see next slide)

Introduction

Methodology

Results

Recommendations

Appendix

**Terms Deconstructed**

**IE Readiness**

The **degree** to which **customs** is **able** and **willing** to participate in information exchange.

**“Degree”** - How wide is the gap between the current and desired state? How clear and convincing is the vision?

Though **customs** is the focal point, it is intricately tied with a large ‘ecosystem’ of relevant trade stakeholders.

**Ability** speaks to more tangible Knowledge and Skills (i.e. IT Systems, Business Processes, Policies, etc.)

**Willingness** speaks to Attitudes (i.e. sponsorship, management, Intelligence & Information System culture)

**IE Maturity**

The **degree** to which **customs** can **respond** (and is **positioned** to react) **appropriately** during information exchange.

**“Respond Appropriately”** speaks to long-term stability and growth in the midst of new challenges, and it most often requires relevant experience and competence

Being well **“positioned”** speaks to leveraging strategic support structures (i.e. Governance, Benchmarking, Customs Risk Management) to make well-informed decisions.

Introduction

Methodology

Results

Recommendations

Appendix

**KEY AREAS FOR IE READINESS**

- 1 Sponsorship
- 2 Existing Agreement in Place
- 3 Value-Add Defined
- 4 Business Process
- 5 Information Technology
- 6 Management
- 7 **Intelligence & Information Sharing Culture**
- 8 Partnerships
- 9 **Legislation & Policy**
- 10 Security, Privacy and Confidentiality

**KEY AREAS FOR IE MATURITY**

- 1 Leadership
- 2 Track Record
- 3 Linkages
- 4 Value Analysis & Benchmarking
- 5 **Customs Risk Management**
- 6 Process & Methodology
- 7 Ability to Monitor & Evaluate
- 8 Governance & Compliance
- 9 Project Management
- 10 Program Management

*Based on the strengthened definitions of IE Readiness and IE Maturity, one new Key Area (“Customs Risk Management”) replaced “Sustainable Operating Model”, and other Key Areas were re-categorized (ex. “Intelligence & Information System Culture” and “Legislation and Policy” were moved from Maturity to Readiness)*

## IE Capabilities: 20 Key Areas Across People, Process, and Product

 Introduction

 Methodology

 Results

 Recommendations

 Appendix

### Notes

1. Readiness and Maturity touch all three domains
2. Not strictly divided by three domains

### Pillar 1

## HARMONIZATION AND STANDARDIZATION

Simple IE Characteristics
Data Processing
“One-Off” Harmonization
Non-Standard Language
Asynchronous Time / Batch
EFT / Electronic Messaging
Lack of Document Management
Lack of Workflow

- *E-manifests*
- *Transport Documents*
- *Arrival Information*
- *Payment Facilities*
- *Etc.*

Complex IE Characteristics
Information Processing
Common Interface
Common Language
Real Time Collaboration
Intelligence, Data Mining, Reporting
Document Management
Active Workflows

### Pillar 2

## COMPUTERIZATION AND EFFICIENCY

- Every customs agency in CAREC has been automated and modernized, and therefore, **all** countries assessed have the ability to engage in IE in its simplest form.
- Simple IE is a key building block in the customs agencies’ integration infrastructure for exchanging information.
- Highly transformative, customs agencies participating in Complex IE shifts from simple data exchange (i.e. Simple IE) with trading partners to a tiered series of standardized, harmonized and automated data and process.

Putting It All Together: High-Level Overview of Methodology

Introduction

Methodology

# MONGOLIA

## IE ASSESSMENT FRAMEWORK

Pillar 1

### HARMONIZATION AND STANDARDIZATION

Simple IE Characteristics
Data Processing
"One-Off" Harmonization
Non-Standard Language
Asynchronous Time / Batch
EFT / Electronic Messaging
Lack of Document Management
Lack of Workflow

Complex IE Characteristics
Information Processing
Common Interface
Common Language
Real Time Collaboration
Intelligence, Data Mining, Reporting
Document Management
Active Workflows

- E-manifests
- Transport Documents
- Arrival Information
- Payment Facilities
- Etc.

Pillar 2

### COMPUTERIZATION AND EFFICIENCY

READINESS

MATURITY

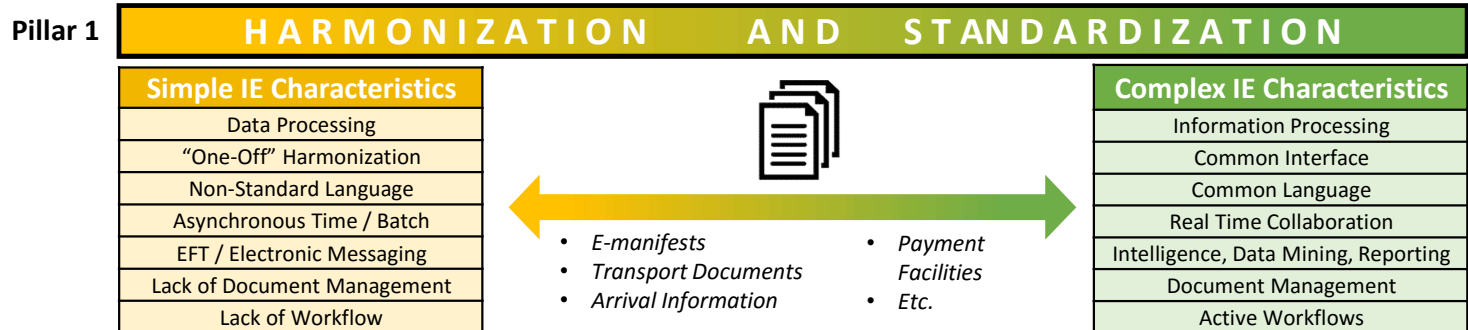

- **Readiness:** Overall readiness score of 2.9
  - Mongolia’s readiness is relatively lower due to changes in government and management.
- **Maturity:** Overall maturity score of 2.1
  - Upstream capabilities (non-technical) that need strengthening include disciplines such as management consulting, business process analysis, project management, program evaluation and program management.
  - Require to build technical capabilities of IT staff.
  - Data quality issues hampering automated risk management.
  - Inter-agency linkages is relatively underdeveloped due to lower in NSW maturity.
- **Bottom-line:**
  - Several important “high-readiness” scores including partnership development, information technology flexible and advance looking legislation and policies.
  - Start with very simple file exchanges.
  - Provided improvements are made to Level 1 and 2 scores, outlook is very promising.

Key Area	Score
Sponsorship	2.4
Existing Agreement in Place	3.3
Value-Add Defined	2.9
Business Process	2.1
Information Technology	3.7
Management	2.3
Intelligence & Information Sharing Culture	2.2
Partnerships	3.2
Legislation & Policy	3.9
Security, Privacy and Confidentiality	2.9
Leadership	2.7
Track Record	3.1
Linkages	1.3
Value Analysis & Benchmarking	2.4
Customs Risk Management	1.9
Process & Methodology	1.6
Ability to Monitor & Evaluate	1.9
Governance & Compliance	3.3
Project Management	1.7
Program Management	1.5

# KYRGYZ REPUBLIC

## IE ASSESSMENT FRAMEWORK

**Pillar 2 COMPUTERIZATION AND EFFICIENCY**

 Introduction

 Methodology

 Results

 Recommendations

 Appendix

- **Readiness:** Overall readiness score of 3.6
  - Demonstrate the Kyrgyz Republic as “ready” except for the lack of Security, Privacy and Confidentiality Laws.
- **Maturity:** Overall maturity score of 3.0
  - Structure, discipline and control still in place after implementation of United Automated Information System in 2012.
  - Upstream capabilities (non-technical) that need strengthening include disciplines such as management consulting, business process analysis, project management, program evaluation and program management.
- **Bottom-line:**
  - Readiness and maturity that go beyond simple file exchanges.
  - Trust model would be difficult to establish without a national Security, Privacy and Confidentiality Laws.

Key Area	Score
Sponsorship	3.1
Existing Agreement in Place	3.0
Value-Add Defined	2.9
Business Process	3.3
Information Technology	4.2
Management	3.9
Intelligence & Information Sharing Culture	3.3
Partnerships	3.3
Legislation & Policy	3.7
Security, Privacy and Confidentiality	1.9
Leadership	3.9
Track Record	3.7
Linkages	3.3
Value Analysis & Benchmarking	2.1
Customs Risk Management	3.4
Process & Methodology	2.3
Ability to Monitor & Evaluate	2.8
Governance & Compliance	2.9
Project Management	3.0
Program Management	2.2

# UZBEKISTAN

## IE ASSESSMENT FRAMEWORK

### Pillar 1 HARMONIZATION AND STANDARDIZATION

Simple IE Characteristics
Data Processing
"One-Off" Harmonization
Non-Standard Language
Asynchronous Time / Batch
EFT / Electronic Messaging
Lack of Document Management
Lack of Workflow

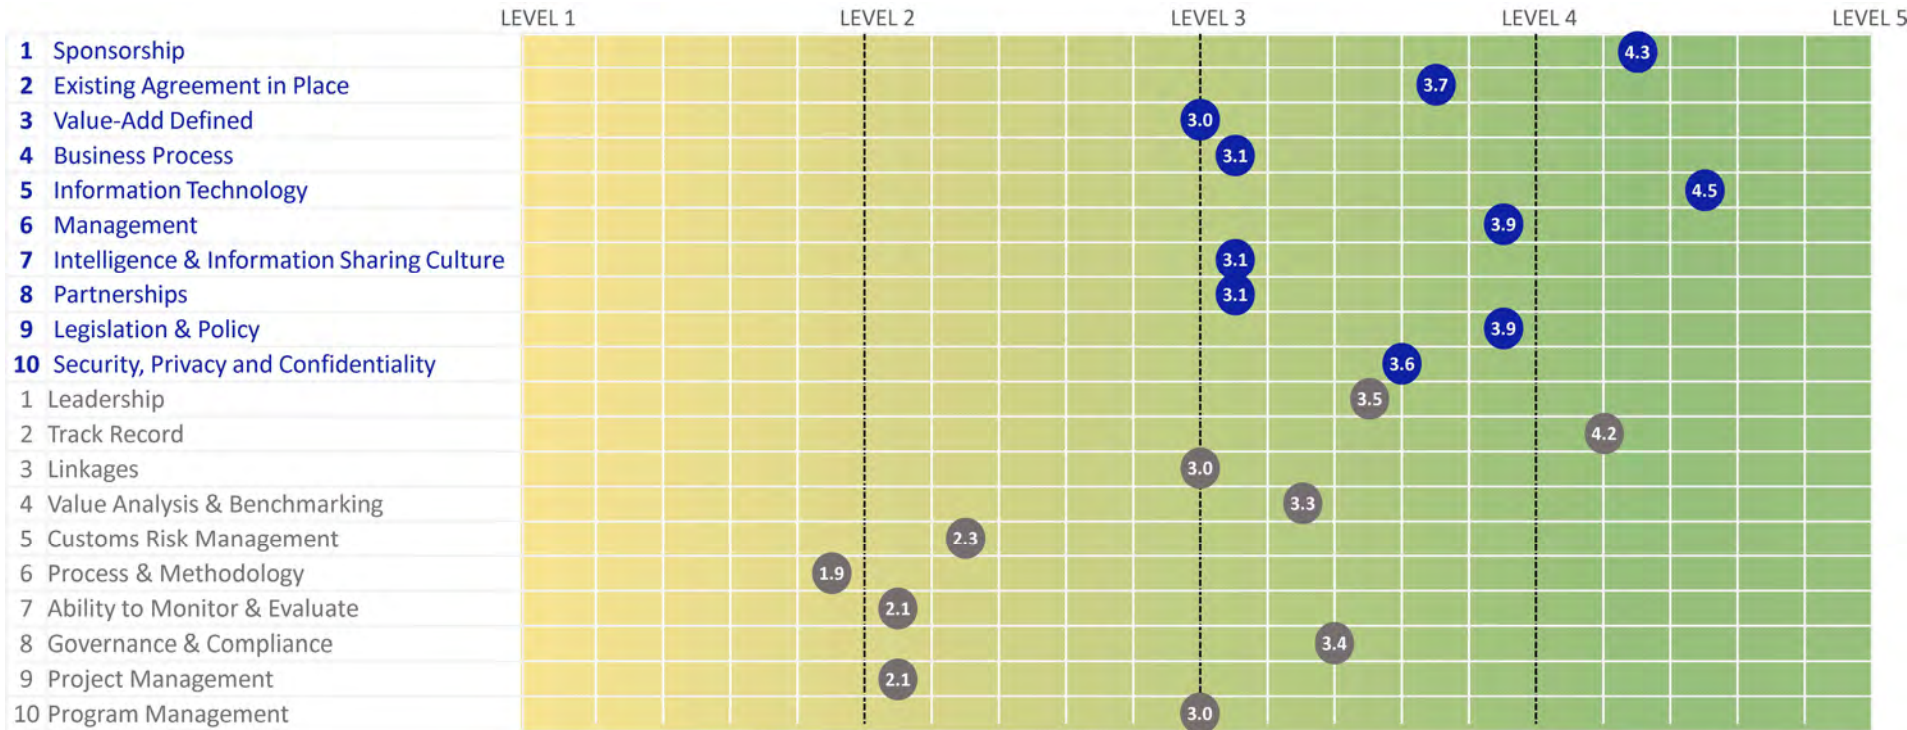

- E-manifests
- Transport Documents
- Arrival Information
- Payment Facilities
- Etc.

Complex IE Characteristics
Information Processing
Common Interface
Common Language
Real Time Collaboration
Intelligence, Data Mining, Reporting
Document Management
Active Workflows

### Pillar 2 COMPUTERIZATION AND EFFICIENCY

READINESS

MATURITY

 Introduction

 Methodology

 Results

 Recommendations

 Appendix

- **Readiness:** Overall readiness score of 3.6
  - Ready to be connected to higher and more sophisticated levels of trade information exchange.
- **Maturity:** Overall maturity score of 2.9
  - Core disciplines for launching a successful project to completion and the potential for interoperability with other external systems outside of UAIS.
  - Start adopting international standards on upstream non-technical capabilities in process and methodology, program evaluation and project management.
- **Bottom-line:**
  - One of the customs agencies of CAREC that have been driving for the concept of an IE platform for the region since 2008.
  - Technically ready and mature to implement IE beyond simple file transfers.

Key Area	Score
Sponsorship	4.3
Existing Agreement in Place	3.7
Value-Add Defined	3.0
Business Process	3.1
Information Technology	4.5
Management	3.9
Intelligence & Information Sharing Culture	3.1
Partnerships	3.1
Legislation & Policy	3.9
Security, Privacy and Confidentiality	3.6
Leadership	3.5
Track Record	4.2
Linkages	3.0
Value Analysis & Benchmarking	3.3
Customs Risk Management	2.3
Process & Methodology	1.9
Ability to Monitor & Evaluate	2.1
Governance & Compliance	3.4
Project Management	2.1
Program Management	3.0

 Recommendations

 Appendix

# RECOMMENDATIONS

## Recommendation 1: Think Big. Start Small. Scale Fast.

Introduction

Methodology

Results

Recommendations

Appendix

- Based on the IE Assessment, all countries are capable of engaging in IE starting with a simple information exchange.
- This includes matching each country's strengths to determine the degree of automation in driving the synergy of the cooperation and importantly, the details of the technical conditions.
- **Recommendation 1:**
  - Using the IE Assessment results, countries currently in bilateral or regional dialogues should consider incorporating IE solutions.
  - Always start small, use simple file exchanges if necessary to get the initiative moving, and scale up accordingly by considering that each IE application and functionality developed are building blocks to demonstrate value and cultivate stronger trade relations.

## Recommendation 2: E-Manifest and Transport Contracts for Pilots

- In the order of priority and demand, customs agencies have expressed the following IE applications can immediately benefit them.
  - E-Manifest** to minimize the amount of manual intervention and to reduce fraud;
  - Transport Contracts** to monitor transport route, means of transport, details of transport vehicle and equipment, packaging used and goods being transported, etc.; and
  - Pre-arrival Information** to determine the admissibility of goods and decrease activity and congestion at the border.

Introduction

Methodology

Results

Recommendations

Appendix

Digitization ↓

- Bare minimum data elements
- Direct electronic messages
- Basic data processing capabilities

- Comprehensive list of data elements
- Intermediate servers / web-based / etc.
- Information processing / risk management

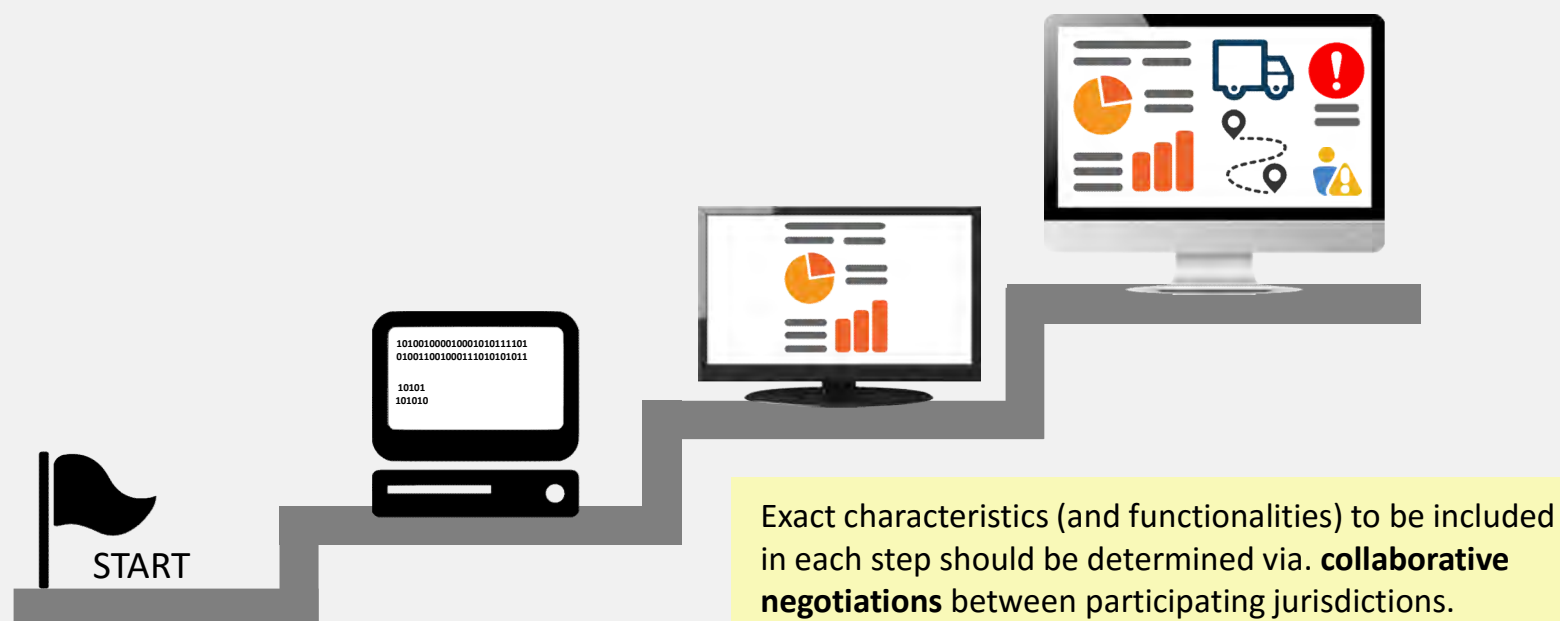

Simple

Complex

## Recommendation 2: E-Manifest and Transport Contracts for Pilots

- Propose E-Manifest and Transport Contracts as the two pilots to be proposed under the TA with the participation of PRC.
- Start with a simple file exchange mechanism with plans, over time, to scale up to a more robust IE platform solutions (i.e. common language, common interface, near real-time, active workflows, etc.).
- Since the assessment has not yet been completed, other countries are to be solicited for their inputs on IE applications that can immediately benefit their agencies and for a pilot project.

## Recommendation 3: Focused Capacity Building via Training, Workshops, & Courses

 Introduction

 Methodology

 Results

 Recommendations

 Appendix

- In all custom agencies where assessment has been completed so far, interoperability and integration would require strengthening of upstream capabilities and non-technical skills to minimize risks for failed implementations, missed requirements, business process inefficiencies and process misalignment.

- Employing the IE Assessment results, low maturity scores are in the non-technical key areas such as process and methodology (1.9), project management (2.2), ability to monitor and evaluate (2.2) and program management (2.2).

- **Recommendation 3:**

- Ongoing professional courses be offered through the CAREC Institute to build capacity and knowledge of customs agencies in these areas.

Key Area	Average IE Score <sup>1</sup>
Sponsorship	3.3
Existing Agreement in Place	3.4
Value-Add Defined	2.9
Business Process	2.8
Information Technology Management	4.1
Intelligence & Information Sharing Culture	2.9
Partnerships	3.2
Legislation & Policy	3.9
Security, Privacy and Confidentiality	2.8
Leadership	3.4
Track Record	3.6
Linkages	2.5
Value Analysis & Benchmarking	2.6
Customs Risk Management	2.5
Process & Methodology	1.9
Ability to Monitor & Evaluate	2.2
Governance & Compliance	3.2
Project Management	2.2
Program Management	2.2

Red-colored texts indicate areas of improvement

1 - Mongolia, Kyrgyz Republic, and Uzbekistan

## Recommendation 4: Completion and Expansion of IE Assessment

- TA 8585 has resulted in generating an unprecedented and landmark study in global trade facilitation and regional cooperation through the IE Assessment.
- CAREC first hand adopters.
- Outcome provides CAREC members with an unbiased view of each country's strengths, the ability to match capabilities and the prescription to move forward in developing successful IE solutions to facilitate trade efficiently.
- **Recommendation 4:**
  - With approval of CCC and ADB, continue assessment for remaining CAREC countries namely: **Azerbaijan, Kazakhstan, People's Republic of China, and Tajikistan.**
  - Furthermore, for completeness across all CAREC member countries, consider expanding scope of the assessment to **Afghanistan, Pakistan** and **Turkmenistan.**
  - Expect completion target by the next CCC on August 2016.

## Recommendation 5: CAREC Regional ICT Strategy

- Critical TA findings observed the lack of a regional strategy for innovation using ICT.
- In support of the CAREC 2020 Strategic Framework, the first CAREC Regional ICT Strategy will focus on trade facilitation:
  - I. Aligning and augmenting country specific customs ICT strategy with the regional ICT strategy;
  - II. Reducing duplication of efforts and resources of individual countries with efforts to harmonize, standardize and simplify using rationalized international standards;
  - III. Strengthening each country's readiness and maturity in the IE Assessment Framework to increase capacity;
  - IV. Sharing and leveraging architectures, solutions and "lessons learned" in trade facilitation; and
  - V. Providing a path for developing a common vision, requirements and solutions such as a regional IE platform among others.
- **Recommendation 5:**
  - Propose another TA (or piggy-back TA) focused on delivering a CAREC Regional ICT Strategy on trade facilitation.
