CAREC ROAD SAFETY STRATEGY 2017-2030

KNOWLEDGE PRODUCTS

Central Asia Regional Economic Cooperation Program

TRAININGS/WORKSHOPS CONDUCTED

Several national and regional trainings/workshops on topics:

- road safety data systems and research
 - road safety engineering
 - road safety education and awareness
 - road safety enforcement
 - pedestrian safety
 - crash data investigation and analysis
 - Road safety audit
-
- Recently, in collaboration with CI and EBRD in Feb, completed a Sustainable road safety course in Bishkek. This had two components:
 - ✓ Online course
 - ✓ 5 day residential course

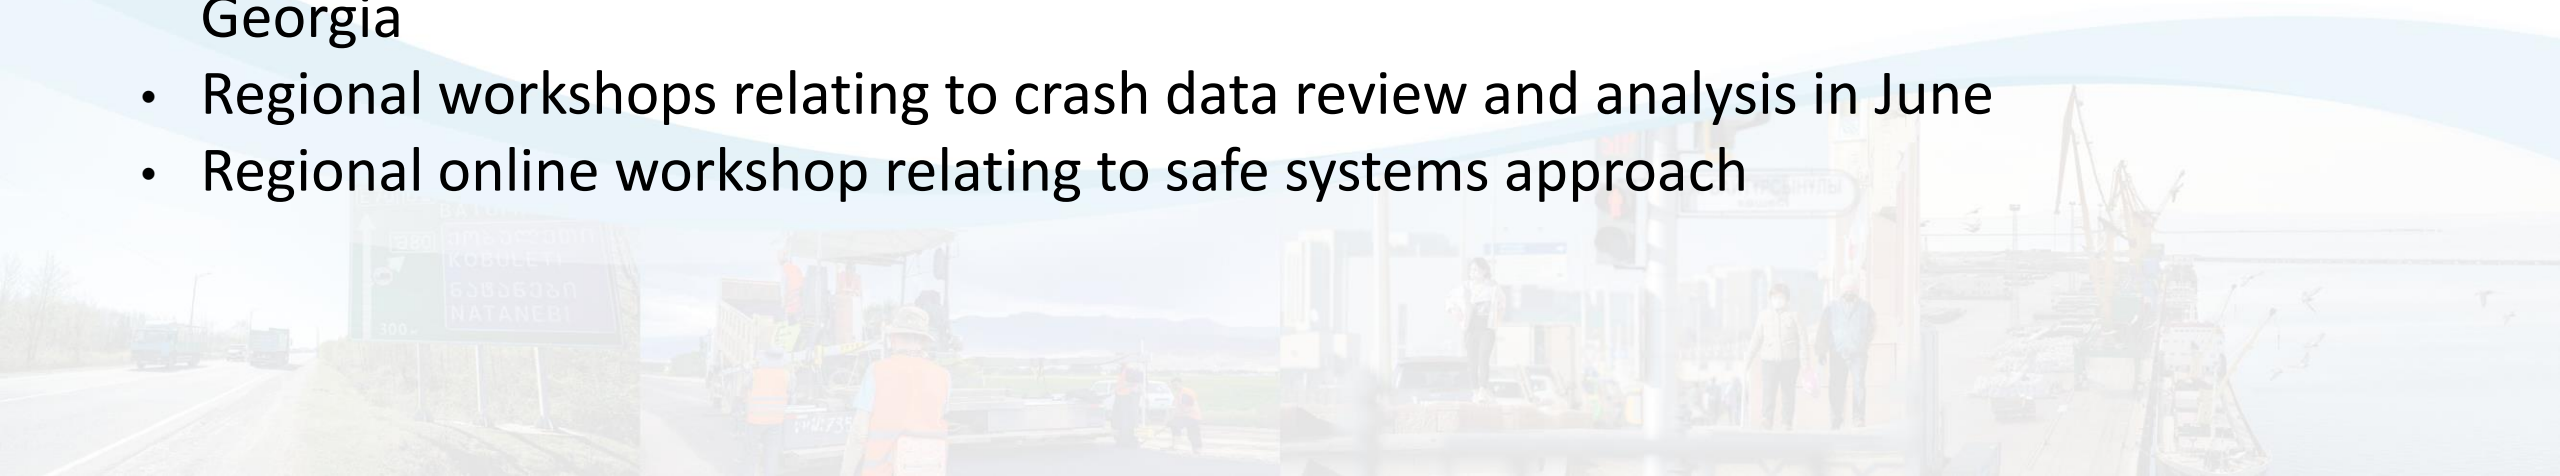

PUBLICATIONS/ KNOWLEDGE EVENTS COMING IN 2024

Publications:

- Blackspot Investigation, Analysis and treatment
- Why and How to manage speed
- Review of crash data in the CAREC region
- Crash Investigation manual
- Interactions of road safety with the climate change

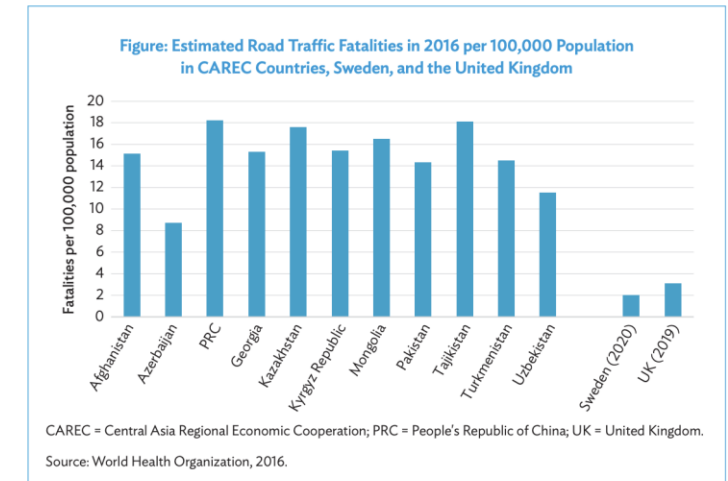

Workshops/Trainings:

- National trainings relating to road safety engineering in Pakistan, Kazakasthan and Georgia
- Regional workshops relating to crash data review and analysis in June
- Regional online workshop relating to safe systems approach

ONGOING ACTIVITIES: CAREC REGION ROAD CRASH DATA REVIEW AND DEVELOP WEB BASED DASHBOARD TO REPORT ACCIDENTS

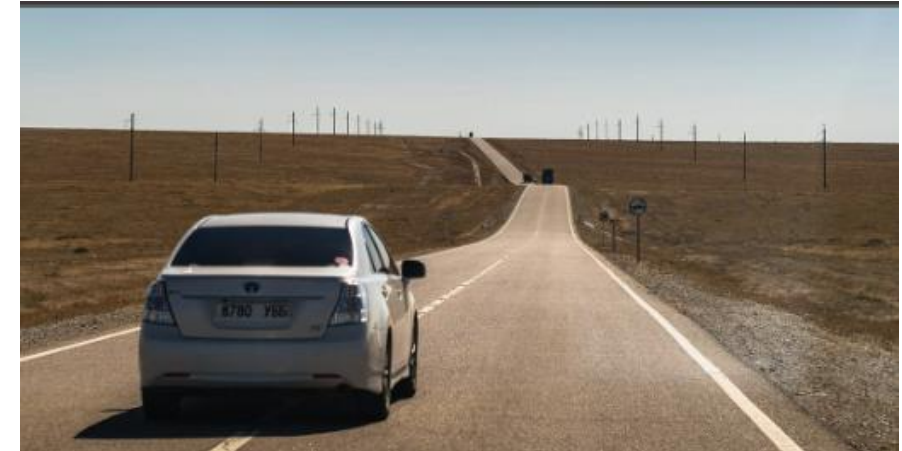

- Country reviews including of crash data management by CAREC member countries, include assessment for collection at the national level and recommendations for improvement
- Propose a standard collision classification system for the CAREC region based on systems used in best practice countries and considering CAREC region specific conditions
- Develop a web-based dashboard to report accidents through existing organizational resources available in each province.
- In-person regional training on improvement to crash data management

ONGOING ACTIVITIES: ROAD SAFETY CAPACITY BUILDING FOR MONGOLIA

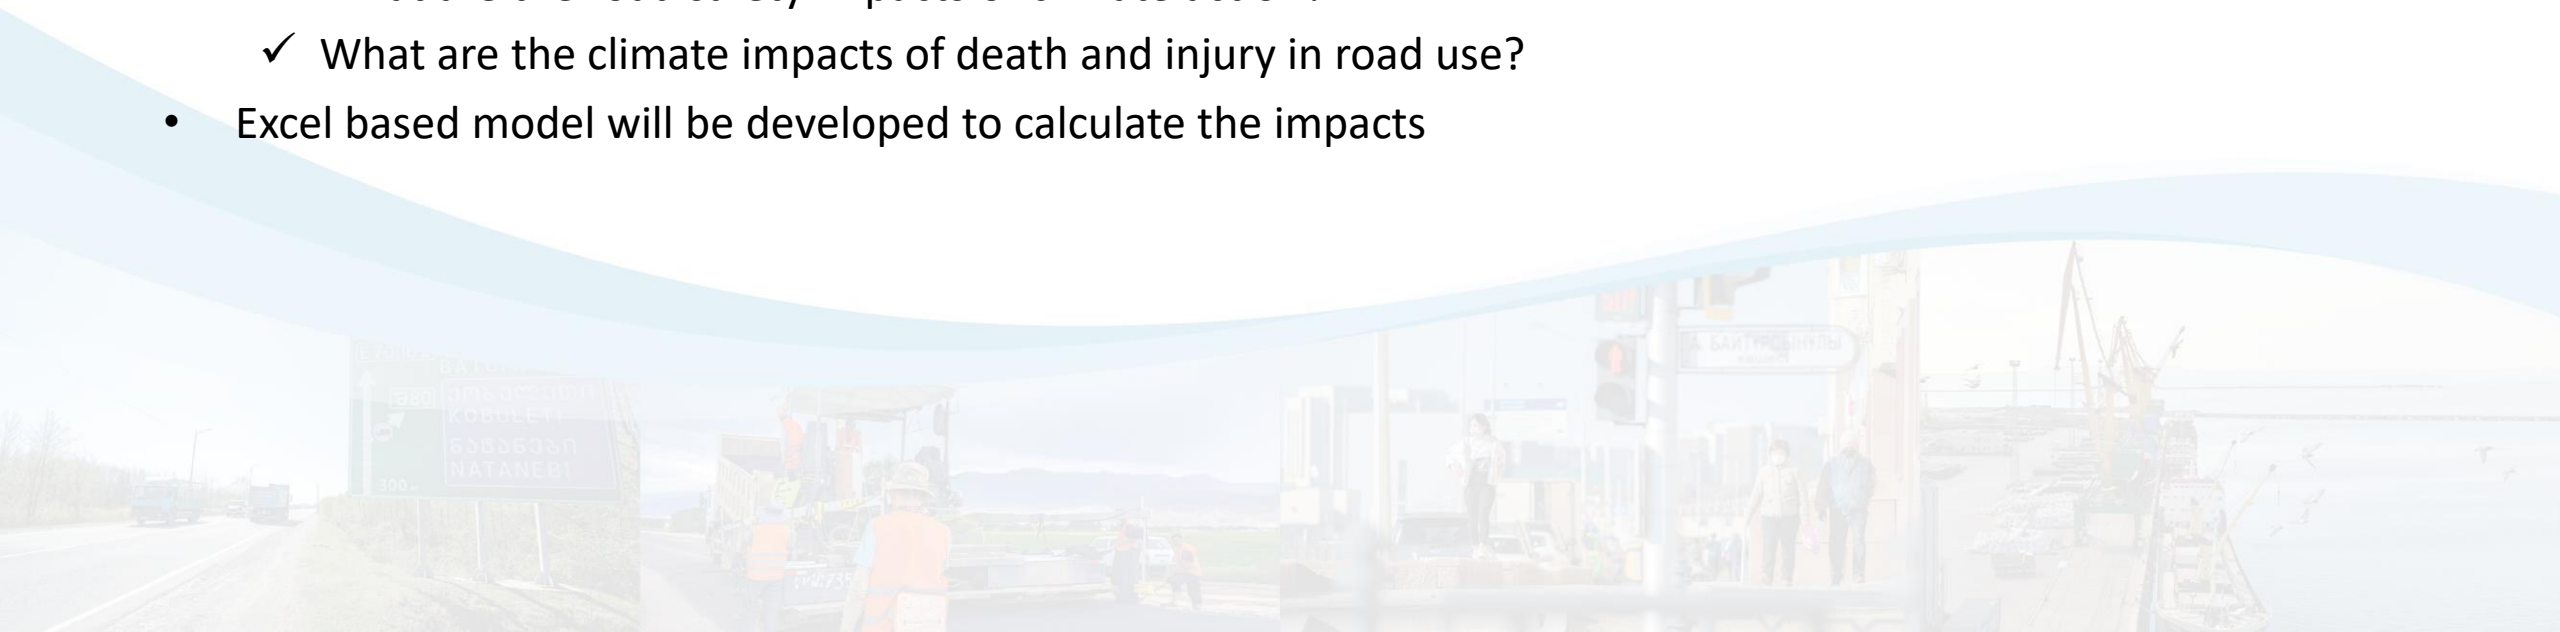

Road safety capacity building for Mongolia:

- ✓ Draft regulations for road safety audits and assessments
- ✓ establish a road safety engineering function
- ✓ Conduct capacity building in road safety principles, management and practice
- ✓ Train road engineers in road safety audit, iRAP assessment and network safety rating

INTERACTION OF ROAD SAFETY WITH CLIMATE CHANGE

- All CAREC Countries are signatories to the Paris Agreement on climate change and have announced decarbonization targets.
- With a strengthened priority for decarbonizing road transport, all aspects of road system management are expected to take into account their impacts on future greenhouse emissions and their alignment with decarbonization pathways.
- The assignment will address three fundamental questions for the CAREC region
 - ✓ What are the climate impacts of road safety action?
 - ✓ What are the road safety impacts of climate action?
 - ✓ What are the climate impacts of death and injury in road use?
- Excel based model will be developed to calculate the impacts

PLANS FOR 2025 AND BEYOND

- Remote and urban road safety
- Occupational road safety
- Commercial vehicle safety
- Financing mechanisms for road safety
- Implementation of national road safety action plans
- Use of ITS and digital technologies to enhance road safety
- Projects and capacity building programs on speed management, vehicle safety standards
- Road safety projects
- Any thoughts/ideas are welcome

Thank you!
