

Activities of the CAREC Institute related to transport

Hans Holzacker

Chief Economist CAREC Institute

Knowledge for Prosperity

The CAREC Institute's activities...

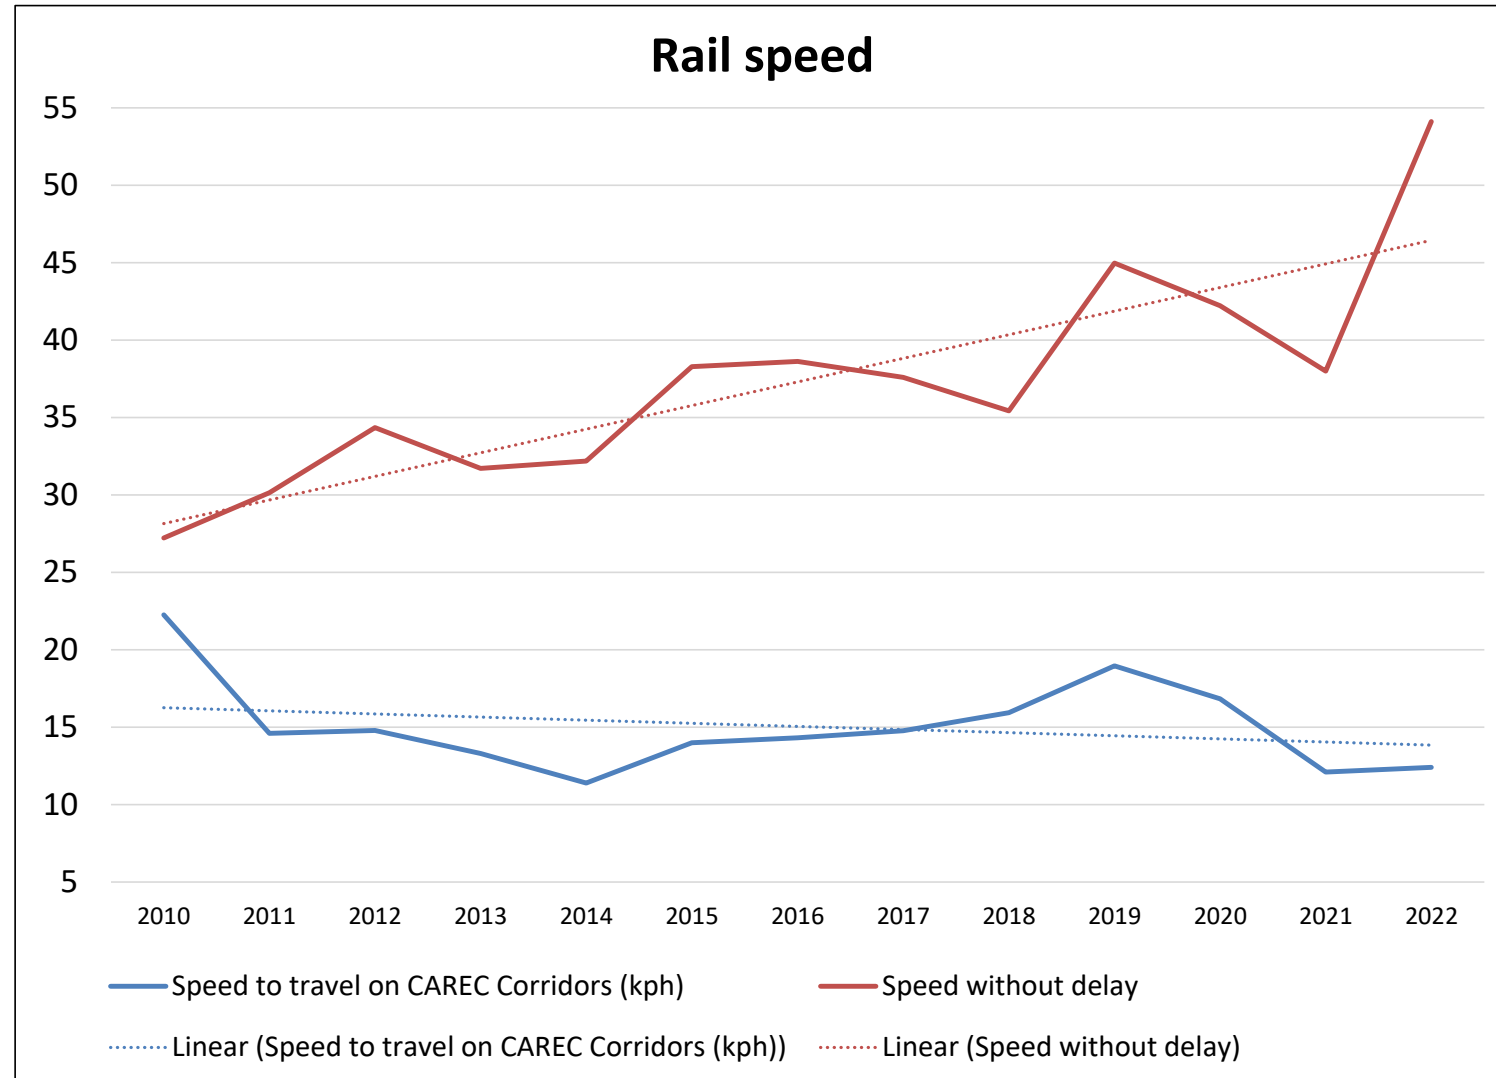

Main research/outreach activities

- **Cooperation with ADB on the *CAREC Corridors Performance, Measurement and Monitoring (CPMM)*; “CPMM Briefs” containing country specific results/recommendations are being disseminated to the CAREC members**
- **Study: Restoration and development of *air transport between China and six selected CAREC countries* (together with the Civil Aviation Administration of China, CAAC)**
- **Upcoming: Scoping Study on *Containerization* in the CAREC region**

Remark: One of the outcomes of the Corridors Performance, Measurement and Monitoring (CPMM) is:

The average speed traveling CAREC corridors without delay has improved quite significantly, especially for rail, but speed with delay has not so much: **Soft infrastructure!!**

Currently, the CPMM is under an upgrading process.
