

Improving the Single Automated Information and Management System: Single Window Principle in Customs Clearance

Presenter:

Kiazim Samedov

Chief Inspector, Software Division, Statistics and IT general Department,
SCC of the Republic of Azerbaijan

Overall Objective

Develop a single software for the efficient customs control and clearance of goods and vehicles moving across the customs border

SAIMS CS

At the Border

- Control of movement of goods and vehicles across the customs border
- Issue of permits, compliance certificates, and licenses by various border agencies
- Control of road taxes settlement
- System for managing RISKS at the border

SAIMS CS

Domestically

- Customs goods clearance system

Project Objective: Simplification of customs goods clearance procedure

- Providing traders and customs officers alike with efficient means, simplifying customs formalities
- Simplifying procedures of obtaining various permits by traders from other government agencies
- Ensuring interaction with relevant government authorities in the process of customs clearance to achieve efficient discharge of law enforcement and fiscal functions

Goods Clearance

- Customs clearance system based on customs cargo declaration (CCD)
- Simplified customs clearance system based on customs receipt voucher (CRV)

Customs Goods Clearance System

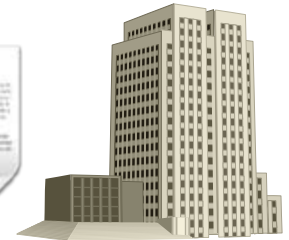

Declarants

- Electronic goods declaration system
- System for obtaining permits, certificates of compliance, and licenses issued by various domestic government agencies

Customs Service

- Electronic customs declaration processing system
- Electronic check of permits, certificates of compliance, and licenses issued by various agencies
- System of RISK management in customs clearance
- Verification of duties and charges payment

Obtaining permits

Goods Declaration System

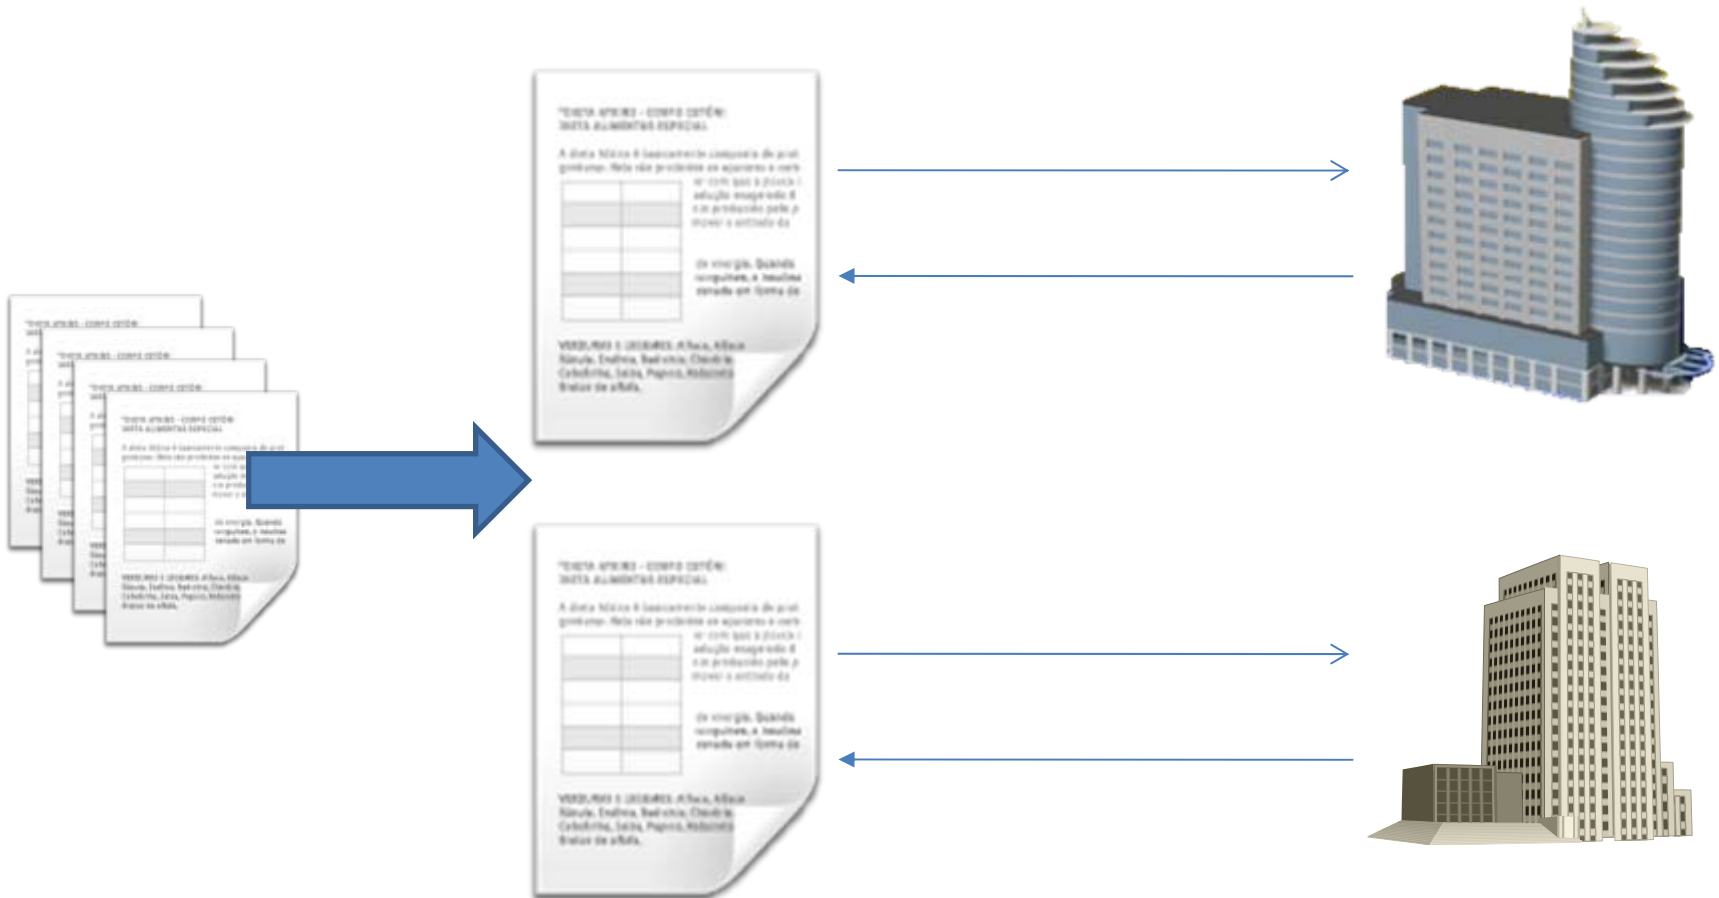

Electronic Customs Declaration Processing System

- Format and logical control
- Electronic processing of goods by the appropriate departments (customs control division, fiscal division)
- Electronic control of goods release

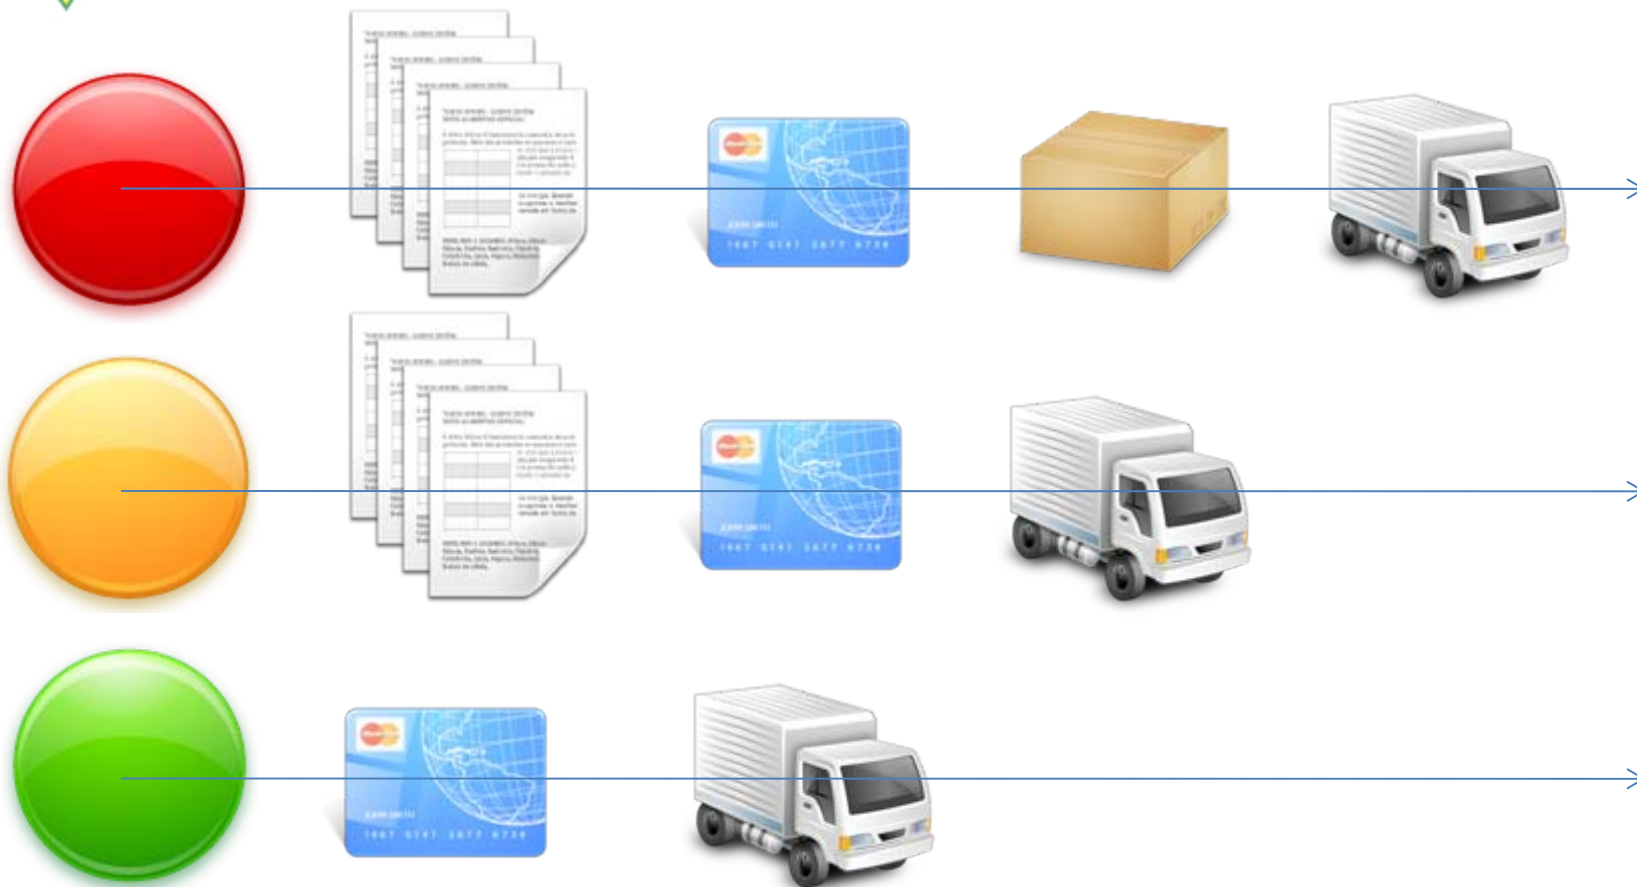

Electronic Checks of Permits, certificates of compliance and licenses issued by various government agencies

System of RISK Management in Customs Clearance

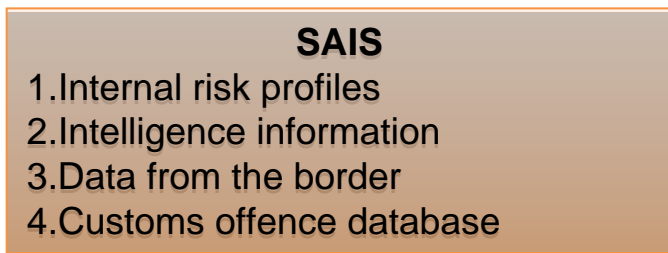

System of RISK Management in Customs Clearance

Internal sources

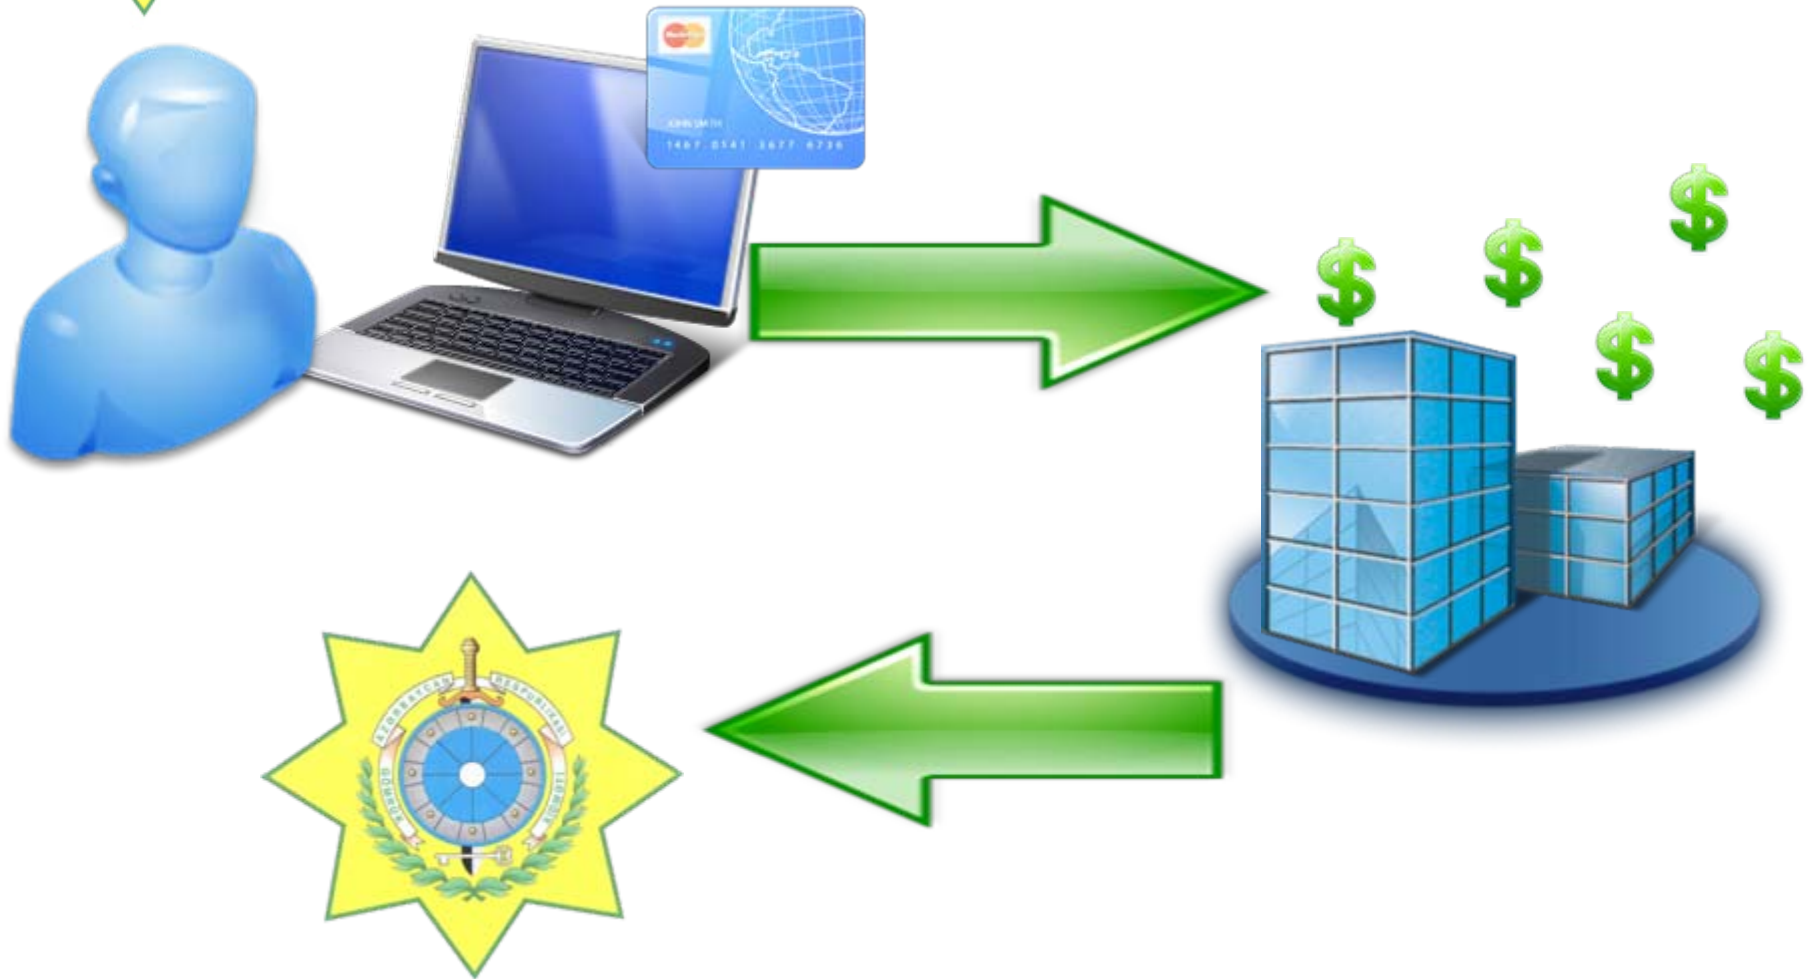

Risk analysis

Single risk profiles base

Control of customs duties and charges payment

CRV-based Simplified Customs Goods Clearance System

- Electronic customs receipt vouchers (CRV) processing system
- Electronic check of permits, certificates of compliance, and licenses issued by various agencies
- System of RISK management in customs clearance
- Control of customs duties and charges payment

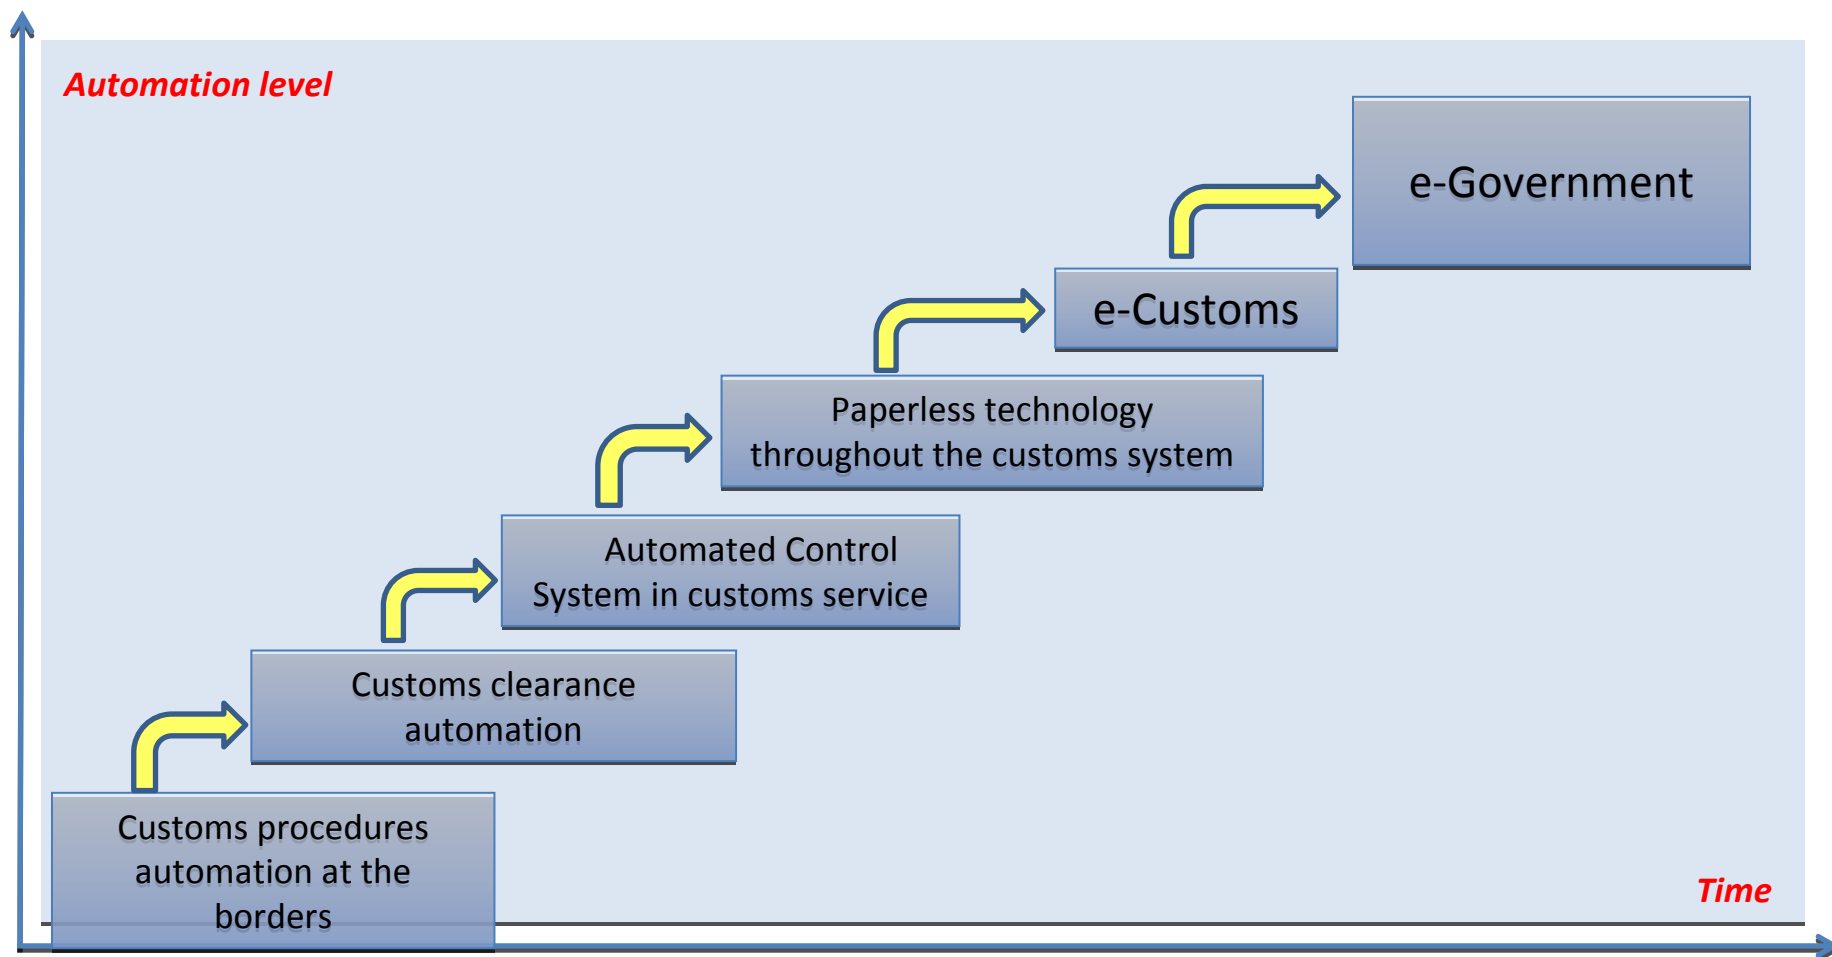

Implementation Phasing

- 1. CRV-based simplified customs clearance system**
- 2. CCD-based customs clearance system**
 - 2.1 Electronic goods declaration system
Electronic customs declaration processing system
 - 2.2 RISK management system in customs clearance process
 - 2.3 Control of customs duties and charges payment
 - 2.4 System for obtaining permits, certificates of compliance, and licenses issued by various domestic agencies
Electronic check of permits, certificates of compliance, and licenses issued by various agencies
