# Goals and objectives of the project

Project goal is setting up of the Information and Logistic Center in a form of Internet portal for the entrepreneurs (freight owners) and transport companies of the CAREC countries:

**1 step** – setting up the pilot portal for testing and studying of the needs of the users

**2 step** – based on the pilot portal to set up the full-fledged platform for the CFCFA members and CAREC countries

**MULTIMODAL TRANSPORT**

Do you need the permanent quantity of freight? Do you want to find the reliable transport company to realize the freight transportation? Do you want to sign a contract for insurance and forwarding of your freight transportation with qualified companies? Or are you looking for logistic warehouse terminals to storage freight? All these you can find at Transport and Logistics Information Portal [www.logistika.uz](http://www.logistika.uz).

The Portal was designed following the results of participants' needs of international freight transportation process, where companies dealing with transportation services, forwarding, storage and customs clearance, are included.

The Informational Platform was created for participant of Transport and Trade Logistics and meets the standards of "Single Window". There every user can find any specific information or service himself related to the transport and trade infrastructure.

Besides this [www.logistika.uz](http://www.logistika.uz) provides national and international carriers to a new logistic service as a road map of driver which makes easier the calculation of the shortest distance between cities of Uzbekistan. This service includes constantly updated information about the objects of roadside infrastructure and services along highways in Uzbekistan, including roads of international importance.

**Driver's Route Map**  
Calculation of the shortest path between the cities of Uzbekistan

There was designed the new Transport and Logistics Information Internet Portal [www.logistika.uz](http://www.logistika.uz), the unique in Central Asian Region. This informational resource is for entrepreneurs (freight owners) and transport companies (carriers) as well as for companies and organizations providing complex of services on forwarding, insurance and customs clearance of cargoes.

# Road map - Driver's Route Map

- | The Road Map has become one of the elements of a modern multimodal transport infrastructure of Uzbekistan and would have a direct impact on enhancement of the current multimodal centers in the cities of Navoi and Angren, as well as of the other logistic centers of Uzbekistan.
- | Road Map of Uzbekistan promotes the further growth of transport and transit capacity of Republic Uzbekistan, growth of new freight flows and export of transport services, as well as extra conveniences for the drivers.
- | Road Map will improve transit competitiveness of the national highways and make them attractive to the international road freight carriers.

Transit carriers

# Road map - Driver's Route Map

- | The important feature of the «Driver's Route Map» is availability of road infrastructure with detailed description and location.
- | Information about road infrastructure will be helpful not only for the drivers, but also for tourists and businessmen.
- | Businessmen of the Republic, with the help of the «Driver's Route Map», would be able to plan and build new road infrastructure facilities and services along the international highways, thus creating the new job opportunities.

СМЕШАННЫЕ  
ПЕРЕВОЗКИ

**June 4-5, Hohhot, PRC**

## Background of the CACFA Transport Information Logistic portal

1. Establishment of the CACFA
2. Success of the [www.logistika.uz](http://www.logistika.uz) portal (pilot preparatory stage)
3. CAREC activities
4. ADB support

## **Need for CACFA Transport Information Logistic portal**

- | Lack of general regional information database about current rules and regulations in the area of transport and logistics;
- | Lack of regional reference-search system and information database about available companies and organizations that provide transport and transport-forwarding services; lack of the list of services and basic tariffs;
- | Reduction of transport and logistic expenses in the cost price of the goods imported or exported to the key commodity markets, by means of enhancing the use of vehicles.

# Country information resources of the portal

## **Rules and regulations:**

Texts of the current rules and regulations, and also of the international conventions in the area of international transportation and trade will be presented in the given section.

## **Information Center:**

In this section, the users can place various announcements, for example about vacancies or about sale of vehicles, etc. In the "Tenders" section one can place the information about tenders or to familiarize him/herself with the existing opportunities; in the «Stories and Publications» section one can find stories and publications about transport logistics.

# Country information resources of the portal

## **Driver's Route Map:**

It is proposed that each country would develop the «**Driver's Route Map**» with road infrastructure - at the first stage along the international corridors that cross the territory of this country.

## **Glossary:**

The given glossary should contain key terminology required for implementation of the foreign trade operations and international freight transportation (in English, Russian, Chinese and country language).

# Mechanism of interaction within the framework of the CACFA portal

- | Each country will have a separate page and its own database.
- | Each CACFA member should assign one person in charge for interaction within the framework of the portal.
- | Portal development interaction mechanism:
  - | - regular provision of information about rules and regulations (once or twice a month)
  - | - regular information updating (preferably, on a daily basis)
  - | - stories, publications, announcements, tenders – as required

[www.cfcfa-logistics.net](http://www.cfcfa-logistics.net)

We look forward to support and cooperation within the framework of the CACFA Transport Information Logistic Portal!

Thanks for attention !
