OPA "Association for Development of Business Logistics"

Association for Development of Business Logistics

www.adbl.uz

Goals and objectives

- Promoting development of transport and trade logistics;
- Creating conditions for organization of specialists training and qualifications upgrading in transport and trade logistics;
- Creating conditions for development of industrial, trade, information, warehousing and other types of logistics in Uzbekistan;
- Establishing and developing cooperation with professional business associations in foreign countries;
- Conducting regional and international conferences, seminars, business forums, trade and industrial exhibitions in the republic and overseas.

At present **25 companies and organizations** are associated members of the ADBL.

Association for Development of Business Logistics

www.adbl.uz

International Cooperation

The Association is a founder of the Carriers and Forwarders Associations Federation of the CAREC countries (CFCFA).

Cooperation with the Asian Development Bank (ADB), Europe-Caucasus-Central Asia Transport Corridor Development Program (TRACECA), Organization for Security and Cooperation in Europe (OSCE), German Society for International Cooperation (GIZ), German Fund for Economic Development and Professional Education (SEQUA).

In October 2012 the Memorandum of Cooperation was signed with the German Logistics Confederation (BVL International).

German Logistics Confederation (BVL)

The German Logistics Confederation (BVL) – is a voluntary union of logistics specialists and management staff consisting of more than **10,000 members**, which have leading positions in business, industry, science and the sphere of services.

The BVL generates initiatives and develops ideas for establishment and development of promising logistics conceptions aimed at streamlining value chains.

German Logistics Confederation (BVL)

Goals and Objectives of the BVL

The BVL is promoting the establishment of a favorable competitive environment for companies' logistics activities both at the national and international levels.

The BVL serves as a forum to exchange experience and ideas among logistics specialists and managers and performs the function of bringing together companies and organizations pursuing similar goals.

Regional groups abroad:

1. Turkey – Istanbul, Izmir
2. China – Shanghai, Beijing, Hefei
3. Russia – Moscow
4. Singapore – Singapore
5. Brazil – San Paulo
6. Uzbekistan – Tashkent

BVL Regional Group in Uzbekistan

Goals and Objectives

- Creating a basis and an information platform to exchange experience and know-how among entrepreneurs of Central Asian countries and Germany.
- Representing interests of the BVL in Uzbekistan and CA countries
- Organizing experience exchange among companies from Germany and Uzbekistan
- Arranging visits to establish cooperation for Uzbek entrepreneurs to Germany and German entrepreneurs to Uzbekistan
- Organization of training and study tours to Germany and Uzbekistan
- Creating conditions to transfer knowledge of specialists in various areas of economy

Association for Development of Business Logistics

www.adbl.uz

On-Going Projects:

- Training and qualifications upgrading for companies' specialists and teachers of educational institutions of the republic in fundamentals and modern logistics methods («LOGISTICS TRAINING») (partner: SEQUA).
- Capacity building through ISO standards and quality management in transport and logistics sectors (partner: GIZ)
- National staff training and qualifications upgrading in fundamentals of international transport law (partner: OSCE).
- CAREC Corridor Performance Measurement and Monitoring (partner: ADB).
- Transport information and logistics portal: **www.logistika.uz**

Transport Information and Logistics Portal

www.logistika.uz

Project's Goal and Objective:

- The project goal – establish a unified Transport Information and Logistics Portal for transport companies (carriers) and entrepreneurs (cargo owners).
- The project objective is to reduce transport and logistics costs in the cost of goods imported or exported to major sales markets by increasing efficiency of use of transport corridors and vehicles.

Transport Information and Logistics Portal

www.logistika.uz

- Today the portal is a platform for cooperation under the CAREC Program providing access for entrepreneurs to unified information databases (based on the Single Window principle):
- This portal provides a database with data of transport and forwarding companies, including information on availability of cargo and possibilities for its transportation.
- The portal is a quick and effective means to exchange information among participants of the cargo transport market: carriers, forwarders, cargo owners and shippers.

Transport Information and Logistics Portal

www.logistika.uz

Portal capabilities:

- A possibility to choose alternative transport means to transport cargo;
- Reduce idle time of the fleet;
- Reduce the number of empty return trips for trucks;
- A possibility to quickly find transport means to transport perishable foods, in particular foodstuff and fruit and vegetable products.

Transport Information and Logistics Portal

www.logistika.uz

Catalogues of the portal with a possibility of free registration

Catalogue of carriers

Catalogue of cargo owners

Catalogue of freight forwarders

Catalogue of warehouse terminals

Catalogue of customs brokers

Catalogue of insurance companies

Transport Information and Logistics Portal

www.logistika.uz

Road Atlas – the Driver's Route Map

- A special feature of the Driver's Route Map is the information on available road-side infrastructure with its description and location.
- The information on road-side infrastructure will be of interest not only for drivers, but also tourists and entrepreneurs.
- The route map can be also useful for entrepreneurs in planning and contracting new road-side infrastructure facilities and services along international highways, thus creating new jobs.

Calculation of the shortest path between the cities of the Uzbekistan [Transport corridors](#)

From: Dzhizak
To: Karshi
☐ Transit carriers

Shortest way calculation: Dzhizak > Karshi
Total distance: 325 km
Fuel consumption (at 10.0 l per 100 km): 32.5 l

Transport Information and Logistics Portal

www.logistika.uz

Further plans to develop the portal

1. **Phase 1** – establishment of a pilot portal to test and study users' demand (www.logistika.uz)

Phase 2 – on the basis of the pilot portal to establish a fully fledged platform for members of the CAREC Carriers and Forwarders Associations Federation (CFCFA) and all countries-members of the CAREC Program.

Proposals for portal development and cooperation with regional programs

Establish the system to exchange information with the TRACECA Program, the IRU New Eurasian Logistics and Transport Initiative (IRU NELTI) and other regional programs related to transport and trade logistics development.

Create Interactive Route Maps of CAREC countries indicating road-side infrastructure on international East-West and North-South transport corridors.

Thank you for attention !
