

## **CATS-ICE BAKU Meeting 12-13<sup>th</sup> March 2025 – Customs Control Facilitation Working Group Agenda:**

1. Review/discuss 2024 progress report KPIs
2. Primary Objectives for the next stage of development –
  - Undertaking a mirror/parallel test with selected trade stakeholders (transporters and Insurers<sup>1</sup>);
  - Undertaking a 'Live' Test of a transit movement/s

(Need a plan for achieving each of these two Objectives - detailing the steps required to be undertaken).
3. From a system security/integrity point of view, we can limit the CATS boxes to be amended – discuss which ones presently can be amended and agree on a new list. Agree on the manual (outside of CATS) system for requesting and approving amendments. Do we need a template form?
4. Review/discuss March 2025 Conformity test results and identify any further 'High' priority changes deemed necessary for Version 2.
5. Review template MoU for identified trade stakeholders to sign to be involved and support a parallel/mirror test of CATS/ICE Version 2.
6. Discuss KPIs for the next system test encompassing both Customs and Trade stakeholders' assessment of the CATS Version 2 system.

---

<sup>1</sup> Each country (Customs) to review and nominate transporters and insurers for possible involvement in a parallel/mirror test of CATS/ICE Version 2.
