PLATTENHARDT + WIRTHGMBH

Fruit storage for up to **270 days**
without loss of quality properties

"AGROPRODUKT ASIA" AGRICULTURAL TLC

КЫРГЫЗПРОДУКТ
Продукция высокого качества

ABOUT THE COMPANY

"Kyrgyzcentrprodukt" trademark "KYRGYZPRODUKT" since 2010, successfully engaged in the export of agricultural products grown in Kyrgyzstan. During this time "KYRGYZPRODUKT" TM has proved to be a reliable supplier, the main principle of work is to provide customers with high-quality products, at prices of the manufacturer and building long-term partnership relations. The company exports agricultural products to more than 10 countries.

In 2011, our company completed the construction of a warehouse base in the Talas region, in Kyzyl-Adyr village. This base is equipped with modern equipment of Turkish and Italian production intended for cleaning, grading, calibration, processing and packaging of beans of different varieties. The engineers from foreign countries were invited and involved to introduce new methods of automatic bean cleaning.

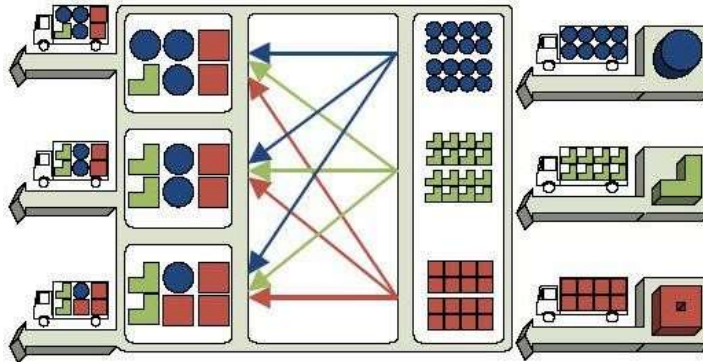

AGRO FOOD CLUSTER "DORDOI FOOD"

"DORDOI FOOD" - is a wholesale and retail food logistics center, a unique modern complex, which has been functioning since 2011. The agricultural cluster "DORDOI FOOD" is a unique system for supply of food products to the capital and regions of Kyrgyzstan. It is created in a manner similar to well-known foreign wholesale food markets.

Thanks to "DORDOI FOOD", agricultural producers receive guaranteed sale of their products, and residents of the city get access to fresh and quality products at the affordable price, both in Kyrgyzstan and abroad.

CROSS-DOCK NO.1
Cross-docking means cross-warehousing, that is, receiving, distribution and shipment of products without placing them in the long-term storage area.

In our Cross-Dock, products are sold and shipped according to this scheme. The products are shipped from one car to another.

Development plans

Thus, as part of strategic planning for development of the agri-food cluster and the wholesale and retail logistics food center "DORDOI FOOD", three activities were identified:

1. Construction of a complex factory for processing and storage; (package /tare production);
2. Construction and launch of the second Cross-dock (increasing the trading area);
3. Construction and launch of the cold storage facility (2,000 tons).

Alamedin Bazaar LLC

- **Alamedin Bazaar LLC was established in 1997. The market is historically located in the eastern part of the city, on the Silk Road route. The market area is 3 hectares. We serve about 20,000 people daily. Geographically, the market is visited by buyers from the eastern, northern parts of Chui region, and Bishkek city residents. Since 1997, we were not staying stagnant; we have reorganized and reformed our entire operation. Reorganization and development have provided new comfortable and equipped job places compliant with international standards. Well equipped trading places were created for the wholesale and retail trade in consumer goods.**

The logistics area represents a complex of specialized terminals and warehouses. The use of logistics complexes in implementation of multi-modular or direct transportation saves 12% -15% of the delivery cost, since the distance from Bishkek to Issyk-Kul and Naryn regions makes 100-500 kilometers, while the distance from Bishkek to Tokmok makes 60 kilometers. Most often, such functions as warehousing, external transportation with customs clearance, internal transportation, consolidation and cargo segregation are outsourced to logistics complexes.

The industrial zone will represent a complex of industrial enterprises engaged in for various activities. The industrial zone will be attractive for the investors who want to place the export-oriented enterprises in the border area. Besides, there are plans to arrange the veterinary, phytosanitary, border, customs services and other export-import procedures agents, and supporting facilities in the industrial zone.

THANK YOU FOR YOUR ATTENTION
